Release Version v2.0 (2014/5/12)

New Features

- **NCS Client**

  1. Support Camera multi-stream (with Mainconsole v5.0)

  2. Central Manual Backup: Support both Alarm & Video central backup

  3. Support lock screen: Able to lock window in full screen to ensure focus on NCS client

  4. Add Camera Link: Able to add direct IP address links to each individual camera

  5. Add Hotkeys to set alarm status for Alarm Real-Time/Output/Output2 and Alarm Management window

Enhancement

- **NCS Client**

  1. All new Alarm Management interface - Live View & Instant Playback on one screen.

  2. Simplifying NCS Client menu layout

  3. Support for NVRmini2/NVRsolo 2-way audio

  4. Support for NVRmini2/NVRsolo snapshot to CMS

Fixed Bug

- **NCS Client**

  1. Only able to "select one" PTZ Camera preset point on NCS Client.

  2. With live view pop-up window, when alarm keeps occurring, the 4th pop-up window (most recent alarm) overtakes the 3rd pop-up window (2nd recent alarm) instead of the oldest alarm. Fixed to overtake the oldest pop-up window.

Known Issue

- **NCS Client**

  1. If an Alarm Note is already written in Alarm Management window, and its alarm status is then changed from Real-Time Alarm list using Hotkey functions, the Alarm Note will appear as blank. However you can still find the Alarm Note details with Advance Alarm Search (under Tools).

Support OS

- Windows XP 32 bit

- Windows Vista 32 bit

- Windows 7 32 bit and 64 bit

- Server 2008 R2 (64 bit)
