

There are some limitations of local display on NVRsolo. Despite the total fps¹, the resolution is restricted to the figures below.

> Video being played or recorded with high resolution is with limited support on local display, which is described as below. If it's over the capacity, it shows "out of resolution" on local display.

Please set the cameras of which resolution are over 1920x1200

In firmware version 1.2 or above

- **H.264**: no resolution limitation on single channel, the total capacity is around:
 - 8 channels: 5M / others: 2M
 - 6 channels: 8M / others: 2M
 - *The actual performance depends on the type of cameras.
- **MPEG4**: Up to 2M (1920x1080) per channel
- MJPEG: Up to 4M (2560x1600) per channel but with limited fps support

Before firmware version 1.2

- **H.264**: Up to 4M (2560x1600) per channel
- **MPEG4**: Up to 2M (1920x1080) per channel
- MJPEG: Up to 4M (2560x1600) per channel but with limited fps support

*Note: The local display won't work if either one side is over the limit.

MxPEG is not supported on local display at all.

No MxPEG

Video is being played or recorded with MxPEG codec currently on a remote browser/application rather than on the local display that doesn't support MxPEG codec.

Refer to **NUUO** wiki for details.

3) MJPEG: 15fps @1280x720

^{*}Note: there is no such limitation in the client PC where you use Remote live viewer, as long as the CPU is powerful enough to handle.

¹⁾ H.264: 120fps @1920x1080 / 240fps @1280x720 2) MPEG4: 120fps @1920x1080 / 240fps @1280x720

	1										-

For LW9422:

- 1. PTZ will stop automatically when press button over 10sec.
- 2. Focus Near / Far need setup the Focus mode in camera's OSD
- 3. Adjust zoom speed is useless
- 4. Can't support dual-stream at H264,1920x1080 (or above), over 20fps

Note: For LW9226:

- 1. PTZ will stop automatically when press button over 10sec.
- 2. Focus Near / Far need setup the Focus mode in camera's OSD
- 2. Audio out impedance is too large.

For LVS201:

1. QCIF has image noise at the bottom line.
