

There are some limitations of local display on NVRsolo. Despite the total fps¹, the resolution is restricted to the figures below.

Video being played or recorded with high resolution is with limited support on local display, which is described as below. If it's over the capacity, it shows "out of resolution" on local display.

Out of resolution:

Please set the cameras of which resolution are over 1920x1200

In firmware version 1.2 or above

- ▶ H.264: no resolution limitation on single channel, the total capacity is around:
 - 8 channels: 5M / others: 2M
 - 6 channels: 8M / others: 2M
 - *The actual performance depends on the type of cameras.
- **MPEG4**: Up to 2M (1920x1080) per channel
- ▶ **MJPEG**: Up to 4M (2560x1600) per channel but with limited fps support

Before firmware version 1.2

- **H.264**: Up to 4M (2560x1600) per channel
- **MPEG4**: Up to 2M (1920x1080) per channel
- ▶ **MJPEG**: Up to 4M (2560x1600) per channel but with limited fps support

*Note: The local display won't work if either one side is over the limit.

MxPEG is not supported on local display at all.

No MxPEG

Video is being played or recorded with MxPEG codec currently on a remote browser/application rather than on the local display that doesn't support MxPEG codec.

Refer to **NUUO** wiki for details.

3) MJPEG: 15fps @1280x720

^{*}Note: there is no such limitation in the client PC where you use Remote live viewer, as long as the CPU is powerful enough to handle.

^{1 1)} H.264: 120fps @1920x1080 / 240fps @1280x720 2) MPEG4: 120fps @1920x1080 / 240fps @1280x720

Fisheye camera

1. Not support MP2L2. (NUUO server limitation)

Note:

2. When audio codec is changed in webpage, audio in IP Camera 2, 3, 4, 5 can't use correct codec. (Camera Firmware issue)

3. If stream mode is " Mode 2: Fisheye / 4 PTZ", the total number of connections is limited. ex: If someone preview "Fisheye view", you are not permitted to preview " 4 PTZ view". (Camera performance limitation)

-: not avaliable on camera

*1: not avaliable on software

*2: not test on software

For multi stream support:

Yes: multi stream fix to 500kbps/100kbps

				: multi strea Yes*: multi			. ,	•					
Device Name	Tested Firmware	Video Format		Max Resolution	Audio	I/O Ch	PTZ	On- Edge Motion	UPnP	Multi Stream Support	Snapshot	Remarks	
Note:	 (Camera issustreams (Known issustresolution of 1s) 	For M15D-Sec, S15D-Sec, D15D-Sec: 1. (Camera issue): The camera with higher quality and resolution is unable to achieve the fps which users set for all streams 2. (Known issue): The actual sub-stream resolution depend on 1st stream resolution value. For example, if users set the resolution of 1st stream to 2048*1536(the ratio of height and width is 4:3) and 2nd stream resolution is 1920*1080, the 2nd stream resolution will become 1440*1080(4:3) instead of 1920*1080(16:9)
