Release Version v2.1 (2015/4/30)

New Features

- NCS Client

    1. Support live video scramble (with Mainconsole v5.2)

Enhancement

- NCS Client

    1 Support offline mode:

    1.1 When server has new configuration update by other user, the user can choose login again to update the configuration or keep as offline mode.

    1.2 In offline mode, user will run out-of-date configuration and still can do live view/backup/export.

    1.3 In offline model, alarm and server status won't be updated and some options will be disabled and be gray out indicating not available.
