## **1.Installation**

#### **1.1 Installation Process**

#### Step 1: Unpack the Unit

This package contains the following items:

Items	Pcs
9P-Terminal Block 3.81mm	2
Red SATA cable	8
Disk screws	32
Power cord	1
Mouse	1
Rackmount kit	2
Rackmount screws	6
Warranty card	1
Quick start guide	1
CD	1

\*CD content: Install Wizard, Remote Live Viewer, Playback System, Backup System, Verification Tool and Offline License Tool application, user manual, and quick start guide

#### Step 2: Install HDD

1. Dismantle the HDD bracket from the cabinet.

2. Put HDD under the bracket and install HDD on the bracket with 4 screws.

3. Assemble the HDD bracket back to the cabinet and insert the SATA cables and power cable.

\*Please remind that the rightmost HDD should be installed forward due to the location of fan.

#### Step 3: Connect the Unit and Devices within the Network

- 1. Connect the unit, cameras, and router/switch.
- 2. If you need to make the video visible over the Internet, please connect to a "router" with Internet connection, and the unit will retrieve an IP address through DHCP by default.

The unit processes built-in DHCP service, which takes the job of router to assign IP addresses, which is suitable for the pure LAN environment.

#### Step 4: Connect the Monitor (Local)

1. The unit processes two display interfaces, VGA and HDMI. Connect the monitor to the unit.

The supporting display resolutions are 1920x1080, 1280x1024, 1280x720, and 1024x768. Please confirm that one of the resolutions is supported by your monitor.

#### **Step 5: Connect the Power**

8bay:

- 1. Connect the power cord directly to the back of the unit. See the rear view figure.
- 2. On the front of the unit, press the power button. See the front view figure.

It takes about a minute for the unit to fully power up. Once it is powered up:

- The System Status LED turns orange. See the front view figure.
- The buzzer beeps one time.

#### Step 6: Install the Software

Please be noticed that you can choose to start up system on the local side or from the remote side. Here is the introduction of remote startup. If you are interested in the local part, please refer to "User Manual (Local)".

- 1. Insert the CD into your CDROM.
- 2. Double-click **Setup.exe** to begin installation.
- 3. Follow the instruction of **Setup.exe**, and click the **Finish** button to close the installer.

#### Step 7: Set up the Unit

The software **Installation Wizard** performs the setup procedures on the unit. After the procedure, you can begin using it.

- 1. Go to Start > NUUO NVRsolo > NUUO Installation Wizard.
- 2. This program will show the default language setting and initiation mode.
- 3. Choose your preferred language and initiation mode, and then click the button.

- Express Mode: you don't need to set up the network and RAID level.
- Advanced Mode: configure all settings manually: network, license, camera, Date/Time, upgrade notification, and RAID level.

4. The **Installation Wizard** program starts searching for all the units on the internet currently. Choose one of them, and then click the **button**.

	FINISH CLOSE

Once the "FINISH" button is clicked, the unit will start working. In order to ensure the stability of the unit, never pull any disks out when the system is running.

## 2.Settings

After setting up the unit, log in to the system by entering its IP address in the browser (Internet Explorer 8, 9, 10, Mac Safari 7.0, Windows Chrome). When connecting, choose your language, enter the username and password, and then begin using this system.

There are five main functions of this unit: settings, live view, playback, help, and logout. They will be shown on the top of the page. Current firmware version and free storage capacity are shown above the function list.

#### 2.1 Camera Setup

#### 2.1.1 Add Cameras by Camera Search

The function enables user to automatically search and add cameras in the same network. There are two search mechanisms, one is UPnP, another is camera search tool. Before searching UPnP cameras, make sure that the cameras possess UPnP function. Refer to **camera support list**.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click IP Camera/ Camera Settings.
- 3. Click the Camera Search tab.

4. Click the **Search** button.

5. The system will list all the currently available cameras. The inserted cameras are shown in blue. Click the 🔹 icon to add a camera into your camera list.

	and in the second second								
amera Settings	Camera Search			_	_				
Camera Search Search Search Complete									
Address	Vendor	Model	MAC	1					

- 6. After clicking the 🔹 icon, the camera setting page will pop up. Click the item to which you want to add a camera.
- 7. Insert the camera name, username, and password.

4			80	- none	none

#### 2.1.2 Add Cameras Manually

- 1. Open Internet Explorer and log in to the unit.
- 2. Click IP Camera / Camera Settings.
- 3. Click the **Camera Settings** tab, and the camera list will be displayed on the bottom of the page.
- 4. Click on the camera list for the channel you want to add and enter the camera's information.

No.	Camera Name	Address	Port	Vendor	Model

- **Camera name**: The name of the camera.
- Address: The IP address.
- **Port**: The transmission port.
- Administrator Name: Login username.
- **Password**: Login password.
- Video Channel: Select the number of analog cameras supported by one video server or select the number of IP cameras possessing multiple

lens/channels.

- **Protocol**: Data transmission protocol.
- Vendor: Camera vendor name.
- Model: Camera model name.

To have better compatibility between camera and system, please make sure the privilege of camera credential is admin-level.

#### 5. Click the **Save** button.

- **Save**: Save the information of this camera.
- **Reset**: Return to the latest saved settings of the selected camera.
- **Clear**: Set all the settings to default value.
- Auto Detection: After inserting IP address, port, username, and password, click this button to automatically detect other camera information, including Channel, Protocol, Vendor, and Model.

#### 2.1.3 Modify Camera Information

- 1. Open Internet Explorer and log in to the unit.
- 2. Click IP Camera / Camera Settings.
- 3. Click the **Camera Settings** tab.
- 4. Click the camera which you want to modify.
- 5. Modify the information of this camera.
- 6. Click the **Save** button.
- 7. Use the same method to replace a camera if needed.

#### 2.1.4 Modify Camera Parameters

Stream profile is designed for mobile client and lower fps live stream display. Without stream profile integration, users cannot watch live video on mobile client nor select lower fps stream on live view. Further, for performance consideration, we fix the resolution and frame rate for each brand/series. Refer to **<u>camera support list</u>**.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click IP Camera / Camera Parameters.
- 3. Click the **Camera Parameter** tab.
- 4. Click the camera which you want to modify on the camera list.
- 5. Modify the information of this camera.

6. Click the **Save** button.

- **Camera Name**: The name of the camera.
- Multi-stream Settings: Enable/Disable camera multi-stream.
- **Stream**: Support up to three streams.
- Video Format: Choose the type of format which this camera supports.
- Frame rate: Select the frame rate of the camera.
- **Resolution**: Select the resolution of the camera.
- **Quality/Bit Rate**: Select the image quality of the camera.
- Audio: Check the Enable Audio option to view and enable audio recording.

In NVR Version 3.0, Video format can support H.265 record and compression with supported camera only.

#### 2.1.5 Set up Lens Settings

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click IP Camera / Camera Parameters.
- 3. Click the **Lens Settings** tab.
- 4. Click the camera which you want to modify in the camera list.
- 5. Modify the information of this camera.
- 6. Click the **Save** button.

amera Parameters	Lens Settings						
Lens Settings							
Camera Name	Juplicate camera 2						
Lens	Enable						
Lens Type	mmerVision IMV1-1/3 V						
Camera Position	none 🗸

3	duplicate camera 2	Disable	none				
4	vivotek	Disable	none				
5		Disable	none				
6		Disable	none				
7		Disable	none				
'							

- **Camera Name**: The name of the camera.
- Lens Type: There are two types of lens currently, ImmerVision and Vivotek (FE8171V). You are not allowed to select type so far, type depends on camera model.
- Lens: Enable or disable lens function.
- **Camera Position**: Select the position of the camera.

#### 2.1.6 View Camera Status

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click IP Camera / Camera Status.

amera	Status Details							
Camera Status								
No.	Name	Address	Connection Status	Rec. Status	Frame Rate	Bit Rate		
1		10.0.16.16	8 0	B B	0.0 fps	0.0 Kbps		
2	NUUOstandal	10.0.16.16	& <del>&amp;</del>	RR	6.0 fps	2551.9 Kbps		
3			8 🖉	R R	0.0 fps	0.0 Kbps		
4			8 🖉	R R	0.0 fps	0.0 Kbps		
5			8 🖉	B B	0.0 fps	0.0 Kbps		
6			8 6	RR	0.0 fps	0.0 Kbps		

• **Connection Status**: The status of the connection. Click the **Connect** or **Disconnect** button to change the connection status.

	Status	Icon		
Connection Status	Connected	G		
Connection Status	Disconnected 🕺			
Connection Status	Connecting	Ø		
Connection Button	Connected: Normal	S		
	Connected: Over	S		
Connection Button	Disconnected: Normal	×		
	Disconnected: Over	8		

#### • **Rec. Status**: The set recording schedule of this camera in this time.

	Status	Icon
Recording Status	No Recording	RR
Recording Status	Always Recording –	00
	Recording with 1st stream	
Recording Status	Always Recording – Recording with 2nd stream	C C
Recording Status	Always Recording – Dual recording with both stream	<b>BB</b>
Recording Status	Always Recording – Stopped	R
Recording Status	Schedule Recording – Recording	<b>::: R</b>
Recording Status	Schedule Recording – Stopped	

- Frame Rate: The frame rate of this camera.
- **Bit Rate**: The transmission bit rate of this camera.
- Estimated Remaining Recording Time: Estimated remaining recording time is dividing the current free capacity by dynamic total bit rate.

•

2<sup>nd</sup> stream does not support for schedule record

If your total bit rate becomes red, it means that the loading of the system is too heavy.

#### 2.1.7 View Camera Status Details

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click IP Camera / Details

C	amera Status Details								
100	Camera Status								
	No.	Name	Stream 1	Stream 2	Stream 3	Total Bit Rate			
	1	Camera 1	8903.7 Kbps	0.0 Kbps	0.0 Kbps	8903.7 Kbps			
	2	Camera 2	7964.3 Kbps	0.0 Kbps	0.0 Kbps	7964.3 Kbps

	6		0.0 Kbps	0.0 Kbps	0.0 Kbps	0.0 Kbps			
	7		0.0 Kbps	0.0 Kbps	0.0 Kbps	0.0 Kbps			
	8		0.0 Kbps	0.0 Kbps	0.0 Kbps	0.0 Kbps			
						25396.5 Kbps			
1	If your total bit rate becomes red, it means that the system load is too heavy								
		odate at 2014年1月16日 下午4:06:15							

- **Stream 1**: The bit rate of stream 2
- Stream 2: The bit rate of stream 3
- Stream 3: The bit rate of stream 3
- Total Bit Rate: The total bit rate of the camera

If your total bit rate becomes red, it means that the loading of the system is too heavy.

#### 2.2 Recording & Event Setup

#### 2.2.1 Recording Mode Setup

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click Recording & Event / Recording settings.
- 3. Click the **Recording Mode** tab.
- 4. If selecting **Always Record**, the chosen cameras will begin to record immediately.

Recording Mode	Recording Schedule Motion Input Advanced						
🗑 Recording M	Recording Mode						
	O No Recording						
	O Record by Schedule						
Recording 1	Avde Always Record Always Record Always Record Camera 1 Camera 2 Camera 3 Camera 4 Camera 5 Camera 6 Camera 7 Camera 8 Camera 9 Camera 10 Camera 11 Camera 12 Camera 13 Camera 14 Camera 15 Camera 16						
Automatic Re	cycle Recycle when the storage space is less than 10 V %						
Keep \	Keep Video Keep Video 7 Days						
Save Reset							

- **No Recording**: Turn off the recording.
- **Record by Schedule**: Recording by schedule.
- Always Record: Permanently turn on the chosen cameras.
- Automatic Recycle: Check the **Enable** option and select the timing of automatic recycle works. We strongly suggest recycling the disk(s) when the storage space is less than 10%. (Default: 10%)
- Keep Video: Set a period during which the recorded video clips will be kept intact. (max: 365)

The privilege of automatically recycle is higher than keep video if you select both.

#### 2.2.2 Recording Schedule / Event Setup

Instead of **Always Record**, you can begin the recording by setting the **Recording Schedule**.

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click Recording & Event / Recording Settings.
- 3. Click the **Recording Schedule** tab.
- 4. Check the **Day** or **Week** mode.
  - **Day**: Schedule the recording to turn the recorder on and off at the same time every day according to your setting.
  - Week: Schedule the recording for each day of the week differently.
- 5. Click the schedule of the camera which needs to be modified.
- 6. Click the column at the bottom of the page.

- **Insert**: Insert new schedules.
- **Delete**: Delete the selected schedule.
- **Configure**: Modify the schedule and recording mode settings.
- **Copy**: Copy current **Day Schedule** to other channel(s); copy current **Week Schedule** to other day(s) of a week or to other channel(s).

Copy Day Schedule							
Apply curre	Apply current Day Schedule to other channels						
Channel 1 Select: all none	🔲 channel 2	🔲 channel 3	🔲 channel 4				
				OK Cancel			

Copy Week Schedule								
Copy Current Schedule								
Apply current Sunday Thursday	nt Week Schedul Monday Friday	le to other weeks Tuesday Saturday	🔲 Wednesday					
channel 1	eek Schedule to	other channels	channel 4					
Select: all none				OK Cancel				

 The default setting of the camera's recording schedule is from 00:00 to 24:00. If you want to modify the time slot, click the **Configure** button to modify the default settings first.

Schedule Configuration	n		
Time	00 • : 00 • 24 • : 00 •	Mode Always Record Motion Digital Input	OK Cancel

8. Choose the recording mode.

Schedule Configu	ration	
– Time – Start Time: End Time:	00 • 00 • 24 • 00 •	Mode Always Record Motion Digital Input
		OK

- Always Record: Always record.
- Motion: Record when camera motion is detected. Go to the "Motion" tab to define which camera's motion detection to associate with this channel of camera to start recording.

NUUOstandalo	one				
Camera3		Motion	Motion on Camera1		
Camera4			Motion on NUUOstandalone		
Camera5					
Camera6					
Camera7					
Camera8					

• **Digital Input**: Record when digital input is triggered. Go to the "Input" tab to define which input triggering to associate with this channel of camera to start recording.

When setting the event Motion, please first ensure that the motion detection function of the camera has been enabled.

9. If you want to add another new schedule, click the **Insert** button to add a new one.

#### 10. Click the **Save** button.

When changing the motion detection settings of a camera, make sure to disconnect your unit and that camera first. Once you have finished, re-connecting them will update the settings in your unit.

There is another way to set the schedule. If you want to change the recording time length, drag the end of the time bar from 24:00 back to the length you wish, and then drag the beginning of the time bar to the point at which you would like it to commence recording. (You may also click the **Insert** button to add new schedules.)

#### 2.2.3 Advanced

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click Recording & Event / Recording Settings.
- 3. Click Advanced
- 4. Click **Always Record**, and choose the camera for this function then 2<sup>nd</sup> stream record will start recording.

If users don't want to **receive** notifications anymore, users can turn off this feature on NUUO mobile client. There is one possibility of de-registering failed, that is, users have ever logged in to the mobile client by typing both LAN IP and WAN IP of the NVR, but only do de-registering on one side.

If users don't want to **send** notifications to certain user account, users can de-select the user account in Event & Action Management page.

User account won't be exported as saving configuration, which implies the user list of push notification won't be saved as well.

### 2.2.8 SMTP Server Setup

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click Recording & Event / Email.
- 3. Click the **SMTP Server** tab.

Email			
SMTP Server	Contacts		
SMTP Serv	er		
Server Address		Port	use SSL
Sender			
Subject	NVR Event		
Body		*	
SMTP Authentication			
Username		Password	
Save	Reset Send	I Test Mail	

- Server Address: SMTP (Simple Mail Transport Protocol) server IP address.
- **Port**: SMTP port.
- **Sender**: Sender information.
- **Subject**: The subject of the mail.
- **Body**: Email content.
- **SMTP Authentication**: Before sending out an Email, enter the username and password for SMTP authentication.
- Username
- Password
- 4. Click the **Send Test Mail** button and the system will send a test mail to the sender. Check it after testing.
- 5. Click the **Save** button.

### 2.2.9 Add Event Contacts

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click Recording & Event / Email.
- 3. Click the **Contacts** tab.

Email				
SMTP Server	Contacts			
🎯 Contact				
Name				
Email				
Add Co	ontact			
Nam	e	Email	Delete	
Save	Reset			

- Add Contact: Add this new contact into the contact list. (Maximum: 40 contacts)
- **Reset**: Return to the latest saved settings of the contact list.
- **Save**: Save this time modification of the contact list.
- 4. Insert the name of a new contact.
- 5. Insert the Email address of this new contact.
- 6. Click the **Add Contact** button.
- 7. Click the **Save** button to save this modification of the contact list.

#### 2.2.10 Set up FTP Server

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click Recording & Event / FTP Settings.
- 3. Set up the FTP server and create a folder for backup files. The folder format is "FolderName", "FolderName/SubFolderName", and so on.

For example: NVR

FTP Settings	
FTP Settings	
FTP Site	ftp.nuuo.com
FTP Port	21
Username	admin
Password	
Back up to Remote Folder	NVR
Save Reset	Test FTP

4. After setting up all the information, click the **Test FTP** button and the system will create a folder to FTP. Check it after testing. In this case, the route of the tested file will be: **ftp://nuuo.dnsalias.com/** NVR/NVRsolo\_ComputerName

5. Click the **Save** button.

Make sure the FTP account with privileges of administrator who is able to upload, rewrite, delete files, and create new folder. Besides, make sure the FTP server has enough space for auto backup.

To avoid the failure of auto backup, please check the normality of FTP server regularly (e.g., enough space for video, system conditions.)

## 2.3 RAID & File Settings

#### 2.3.1 Create a RAID Volume

In this system, the term RAID volume refers to one or more disk drives working together as a RAID logical drive. You must create a RAID volume before starting to record.

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click RAID & File System / RAID Management.
- 3. Click the **Create** tab.

RAID Management				
RAID Status         Modify         Create         Delete         Format				
🧭 Create RAID	Create RAID			
	RAID Level	🔿 RAID 0 🖲 RAID 1 🔿 RAIE	5 🔿 RAID 10	
Embedded	Assign Disk(s)	Disk 1	>> <<	
Create Reset				

- 4. Choose the RAID level you prefer for your disk array.
- 5. Check boxes of disks and click the >> button to assign disk drives for this volume.
- 6. Click the **Create** button.
- A confirmation dialog pops up. Check the Yes, I want to create volume with those disk(s) box, and click the Yes, create it button.

Use those di	sk(s):		
Disk Name	Model	Capacity	
Disk 1	ST31000525SV	931 GB	
Disk 2	ST31000525SV	931 GB	

8. Creating RAID volume takes a while, depending on the size of disks and the RAID level you choose. You can start recording during RAID creation.

RAID Status Modify CI	Delete Format
😸 RAID Status	
List	Status
	RAID Name VOLUME1
- VOLUME1	RAID Level RAID1
Disk 1	RAID Status Functional
Disk 2	Total Capacity 931.51 GB (953868 MB)
DISK2	Free Capacity N/A
	Used Capacity N/A
	Usage
	Update Time 2011 / 4 / 26 PM 12:37:37
	Total Devices 2
	Active Devices 2
	Failed Devices 0
	Spare Devices 0
	Format Progress
	Recovery Progress 1%

The RAID Volume will be functional on another unit if **all** disks of this volume are moved to the unit.

After setting RAID level, you are not allowed to change neither the RAID level nor the number of disks containing in this volume.

Separate embedded disk(s) and external disk (DAS) from two groups, which implies there is no way to create a single volume with both embedded and external disks inside.

For 8-bay RAID model, when creating RAID volume, please note that HDD tray on top(HDD1,2,3,4) are 1 group, while bottom tray (HDD5,6,7,8) is another. For example, HDD1 and HDD4 can be created as 1 volume; while HDD1 and HDD5 cannot be created as 1 volume.

To reduce the possibility of having problems to access public folder via My Network Places, before creating new disk volume or modifying volume, please delete the invalid volume if any.

If you choose Express Mode when using the **Installation Wizard**, the disk(s) will be set to RAID 0 automatically unless the number of disks is not enough for this RAID level.

To make sure all the information of hard disk and RAID volume are correct, 8bay RAID model are not allowed to query status, create, modify, delete, format RAID volume when the front panel is opened.

Not support disk hot swap on external storage currently. Please reboot the unit after the installation.

### 2.3.2 View RAID Volume Status

RAID status refers to the disk drives on your unit and how they are arranged into a RAID volume.

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click RAID & File System / RAID Management.
- 3. Click the **RAID Status** tab to view the status of your RAID Volume.

- **RAID Name**: Name of your RAID, automatically assigned when it was created.
- **RAID Level**: RAID 0, 1, 5, or 10, specified when it was created.
- **RAID Status:** *Functional* is normal. *Critical* means there are some problems on RAID volume, but the recording status is normal. *Offline* means that no volume is found, so recording is stopped and you cannot access your data either. *File system error* means that RAID volume is existed but unmounted, so recording is stopped and you cannot access your data either.
- **Capacity**: Total, free, used data capacity of the RAID volume.
- **Update Time**: The time of volume created/updated.
- **Devices**: Total number of disks and the number of active, failed, spare disks.
- Format Progress: The status of RAID format

### • **Recovery Progress**: The status of RAID recovery

To make sure all the information of hard disk and RAID volume are correct, 8bay RAID model are not allowed to query status, create, modify, delete, format RAID volume when the front panel is opened.

#### 2.3.3 View Disk Drive Information

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click RAID & File System / RAID Management.
- 3. Click the **RAID Status** tab.
- 4. Click on a disk directly to view the information.

🧭 RAID Status		
List	Status	
– Volumes	Vendor	ATA
- VOLUME1	Model	ST2000NM0011
Disk 1	Capacity	1863 GB
DISKT	Firmware Version	SN02

		Test

- **Vendor**: Delivers the manufacturer of the disk.
- Model: Delivers the model number of the disk.
- **Capacity**: Total, free, used data capacity of the disk.
- **Firmware**: Delivers the firmware version of the disk.
- **Serial No.**: Delivers the serial number of the disk.
- **RAID Status**: Delivers the status of the RAID that the disk belongs to.
- **Drive Health (SMART)**: Delivers the status of drive health by SMART self-test. The results will show as follows. Click on the icon to view the detail SMART test report.

Icon	Status	Details
V	Good	The disk is healthy and able to work normally.
<b></b>	Warning	The disk is damaged. Recommend you to change the disk as soon as possible.
8	Abnormal	The disk is damaged seriously and it may cause the system errors. Strongly recommend you to stop recording and change the disk immediately.

- **Temperature**: Delivers the temperature of the disk.
- **Previous Test Time**: Delivers the previous SMART self-test time.
- SMART Status Check: Run SMART test to update the Drive Health result. The test divides into 2 modes, Short Test and Extended Test. Both of the test modes may affect the recording performance. You may need to stop recording to run the test.
- 5. Enable and click on **Test** button to run SMART test.

ОК

7. Click on **OK** button to exit.

To make sure all the information of hard disk and RAID volume are correct, 8bay RAID model are not allowed to query status, create, modify, delete, format RAID volume when the front panel is opened.

### 2.3.4 Modify RAID Volume

This function is designed for replacing a broken hard drive with a new one, instead of modifying RAID level.

In the condition of critical RAID status, it's a warning to show that one of disks of this RAID volume may be damaged. Even though it's no impact on the recording function, you'd better to replace a new disk to make sure the volume with data protection mechanism.

This function is not applied to RAID 0, since there is no data protection mechanism by its nature.

In case of any unexpected damage, we recommend users to unplug running HDD by this method, which can be viewed as security hard drive remove.

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click RAID & File System / RAID Management.
- 3. Click the **Modify** tab.

AID Sta	atus Modify	Create De	lete Forr	nat		
👌 RA	ID List					
	Volume	RAID L	_evel	RAID Capacity	RAID Sta	tus Details

	Disk 2	ST31000525SV	931 GB	
Yes, I want to delete	this volume			
res, I want to delete	this volume.			
			Yes, delete it.	Cancel

7. System will restart automatically after RAID volume is deleted

When you delete a RAID Volume, all the folders in the RAID volume and all the data saved in the folders will be deleted. Backup any important data before deleting a RAID Volume.

To make sure all the information of hard disk and RAID volume are correct, 8bay RAID model are not allowed to query status, create, modify, delete, format RAID volume when the front panel is opened.

### 2.3.6 Format

Neither pressing reset button nor loading default setting, the data of RAID volume won't be deleted, which implies that format is the only way to clean the RAID information from disks.

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click RAID & File System / RAID Management.
- 3. Click the **Format** tab.

D Status		eate Delete	Format		_	_
RAIDL	Volume	RAID	Level	RAID Capacity	RAID Status	Details

Yes, I want to forma	t this volume.			
			Yes, format it	Cancel

7. System will restart automatically after volume format is complete.

### 2.3.7 Modify the FTP Protocol Settings

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click RAID & File System / Protocol Control.
- 3. Click the **FTP Sharing** tab.
- 4. Check and enter the settings of this unit.
- 5. Click the **OK** button.

Protocol Control	
FTP Sharing	
🗑 FTP Settings	
Services	O Enable      Disable
Command Port	21
Passive Ports	1024 ~ 65535
OK Cancel	

- **Services**: Whether users can access this unit through FTP or not.
- **Command Port**: The port for commands between a server and a client.
- **Passive Ports**: The data transmission port of passive mode.

## 2.4 Auto Backup

This feature enables you to automatically backup the recorded video of the previous date to FTP site. There are two steps to enable the function, one is **Set up Backup Schedule**, another is **Set up Backup Server**.

#### 2.4.1 Set up Backup Schedule

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click RAID & File System / Auto Backup Management.
- 3. Click the **Backup Schedule** tab.
- 4. Set up backup schedule, select the backup channels, and check the **Enable** option to enable **Auto Backup**.

Auto Backup Ma	nagement
Backup Schedule Backu	p Server
Backup Schedule	
Auto Backup	✓ Enable
Daily Backup Time	00 : 00
Video Start Time	07 : 00
Video End Time	18 : 00
Camera	select: all / none V Camera 1 V Camera 2 V Camera 3 V Camera 4
🧭 Current Event Setti	ngs
Unable to access FTF	Enable
Backup Unfinished	Enable
Save Reset	

• Auto Backup: Check the **Enable** option to enable this function.

- **Daily Backup Time**: The daily scheduled time to start backup process.
- Video Start Time: The start time of recorded video of the previous date.
- Video End Time: The end time of recorded video of the previous date.
- **Camera**: Select the channel(s) to backup.
- Current Event Settings shows the condition of the events of auto backup

   enable or disable. Follow the steps of System Events and Responding
   Actions Setup to configure the event & action.

The system backups recorded video files one by one. If the connection between the unit and FTP server is normal, but some problems of FTP causes the system unable to write files on FTP, the system would try each file three times before starting to backup the next file. If the connection is lost, the system would wait for the connection, so no file would be skipped.

Please make sure the network is stable and the bandwidth is more than 2 Mbps for backup videos.

# 2.5 Network Setup

### 2.5.1 View Network Status

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click Network Setup / Network Setup.
- 3. Click the **Information** tab to view the unit's network information.

ation	Setup	DDNS Setup	UPnP Port Forwarding

Setting	🛇 Smart enable 💿 Always disable
IP Address	
Subnet Mask	
Default Gateway IP Address	
Primary DNS	
Secondary DNS	
Starting IP Address	
Ending IP Address	
OK Cancel	

#### • Server Name: Name your unit.

Because of the internal data modifications required, it takes a few seconds to change the name of your unit. Log in again after configuration activated.

- Internet Interface (WAN): The selection is for choosing which LAN is connected to the internet, which implies that there is no longer to fix the Internet access to LAN 1 for sending mails, activating license online, receiving auto upgrade notification, etc.
- **Internet Protocol**: Choose to obtain an IP address from external DHCP server automatically, or configure the IP address manually.
- **IP Address**: IP address of this unit.
- **Subnet Mask**: Subnet mask address.
- **Default Gateway IP Address**: Gateway IP address.
- **Primary DNS**: Primary DNS (Domain Name System) address.
- **Secondary DNS**: Secondary DNS address.

The unit specifies two Giga LANs. We recommend using them under the scenario of two subnets, one is for cameras/devices, and the other is for remote access. If you deploy two LANs on the same subnet, it's likely to make parts of camera disconnected as either one of LAN is disconnected.

If all cameras are disconnected, please check if the network settings are

- LAN 1: static IP 192.168.1.100 (default) / not connected
  - LAN 2: DHCP / connected to switch, which subnet is 192.168.1.X
  - or static IP 192.168.1.X / connected to switch, which subnet is 192.168.1.X

The reason of disconnection is that system transmits package via LAN 1 in such condition. The solution is changing the LAN 1 settings to DHCP or connecting network cable on LAN 1.

- 4. The unit possesses built-in DHCP service, which enables the system to dynamically assign IP addresses to the connected camera clients within the same subnet.
  - Setting: Two options of built-in DHCP service, smart enable and always disable. When you have router in your network, we strongly recommend choosing "always disable" to avoid any IP conflicts. If you are not sure if there is any router in your network, please choose "smart enable", which detects the network environment then decide to enable or disable the service.
  - **Starting IP Address**: The IP address for the built-in DHCP to start assigning from.
  - Ending IP Address: The end of the IP address that the built-in DHCP assigns.
- 5. If you are using ezNUUO service. You can skip the DDNS setup. For more information, please refer to <u>ezNUUO</u>.
- 6. Click the **DDNS Setup** tab to enable Dynamic Domain Name Server function, allowing you to connect unit with dynamic IP address.

### 2.5.3 Auto Port-Forwarding

If you are using ezNUUO service. You can skip this section. For more information, please refer to <u>ezNUUO</u>.

This function is designed for saving time in port configuration on router if users want to access the unit (in LAN) from WAN. Once enabling UPnP Service on router, users can do port-forwarding for setting page (default: 80), liveview (default: 5150), playback (default: 5160), and CMS (default: 5170) automatically.

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click Network Setup / Network Setup.
- 3. Click the **UPnP Port Forwarding** tab.
- 4. Click the **Search** button, and the searched routers will be listed.

	Setup	DDNS Setup	UPnP Port Forwarding	-	_

51673		192.168.8	1000	51673			
	cal Port	1000	tual IP	in in the second	al Port		
47500		192.168.8	.223	47500			
47500		192.168.8	.223	47500			
1234		192.168.9	.55	1234			
80		192.168.3	.50	80			
5150		192.168.3	.50	<mark>515</mark> 0			
		192.168.3	.50	5160			
5160			.50	5170			

For security reason, the privilege of UPnP port-forwarding is LOWER than port-forwarding configured on router. Therefore, if the ports have been used on router, we are unable to know before finding out access failure.

UPnP port-forwarding is for temporarily use only. Most of UPnP router will clean up all UPnP ports after router reboots. Furthermore, for some routers, if the port you want to add has already been used for other devices in the same way (UPnP port forwarding), this "enable" action will cover over the settings.

### 2.5.4 Network Service Setup

1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the

unit.

- 2. Click Network Setup / Network Service.
- 3. Click the **Web Service** tab
- 4. Set up a port for this unit and click the **Save** button.

Neb Service	Live View & Playback Service		CMS Service	
👌 Web Ser	ver			
	Management Port	80		

5. Click the Live View & Playback Service tab.

leb Service Live	/iew & I	Playback Service	CMS Service		
J Live Streaming	Serve	r			
	Port	5150			
Maximum Connections 16					
👌 Playback Serve	≥r				
Port		5160

🕝 Black/White Li	st				
White List	🗌 Enat	le			
Black List	Enat	le			
	Add	I to White List	to Add to Black List		
IP Range		Index	IP	Access	Delete

#### • Live Streaming Server

- > Port: Live streaming transmission port.
- Maximum Connections: Maximum connections from remote access. (Max: 64)
- Playback Server
  - Port: Playback transmission port.
  - Maximum Users: The number of users who can access playback functions at the same time. (Max: 8)
  - Log Access: Check to record playback access information on NVR Log page, including access time, playback video channels, and time frame.

### • Allowed/ Blocked List

- Allowed List: Only IP addresses from the allowed list are allowed to log in.
- Blocked List: IP addresses from the blocked list will be unable to log in.

When setting Maximum Connections in Live Streaming Server settings, 1 connection means that one user connects to one camera. If the maximum connections value is set to 16, and each user connects to 4 cameras, the allowed connections per user will become 4, rather than 16.

## 2.5.5 CMS Service Setup

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click Network Setup / Network Service.
- 3. Click the **CMS Service** tab.

eb Service	Live View 8	Playback Service	CMS Service	
👌 CMS Serv	er			
CMS Server		Enable		
Port		5170		
Maximum C	onnections	8		

- **CMS Server**: Check the **Enable** option to enable CMS service.
- **Port**: the port number through which the CMS connects to this unit.
- Maximum Connections: The maximum number of allowed CMS connections.

### 2.5.6 ezNUUO

ezNUUO is designed to truly simplify the process of establishing Internet access to NUUO systems. It eliminates the need for setting up port forwarding and configuring DDNS. Simply register a server ID on the setting page, then go to ezNUUO website or sign in NUUO iViewer App to watch live videos and playback from wherever you are.

1. Open Internet Explorer or Windows Chrome and log in to the unit. (Please

note Mac Safari is not supported)

- 2. Click Network Setup / ezNUUO Registration.
- 3. Click the **Registration** tab.

ezNUUO	Registration
Registration	
😸 Registra	ition
	r a server ID and access to NVR via web browser and mobile phone without router setting. To feature, you need Internet access to the LAN where the unit is installed
Server	
	Test
Save	Reset

- 4. Enter a desired server ID in the Server ID field.
- 5. Click the **Test** button to check the availability of the desired server ID.
- 6. Click the **Save** button.
- 7. Now you can login to <u>www.eznuuo.com</u> on a Windows web browser to configure, watch live videos and playback with any other settings, such as port forwarding or DDNS setup. All you need to know is the server ID, username and password. What's more, you can also sign in to NUUO mobile app iViewer to watch live videos and playback from everywhere you are.

To support to access to the NVR system via mobile app iViewer, you have to upgrade the iViewer to v3.0 or above.

## 2.6 Management

### 2.6.1 View the List of Users

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and login the unit.
- 2. Click Management/ User Management.
- 3. Click the **Create New Users** tab.
- 4. The list will be displayed on the bottom of the page.

🕑 Us	er List							
No.	Name	Group	Live View	Playback	Local Sign-in	Local Configuration	Backup Data	Delete Data
1	supervisor	power user	1,2,3,4	1,2,3,4	0	0	0	0
2	guard	user	1,2,3,4	1,2,3,4	0	Х	0	х
3	temp	guestuser	1,2,3,4		Х	Х	х	х

### 2.6.2 Create New Users

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and login the unit.
- 2. Click Management/ User Management.
- 3. Click the **Create New Users** tab.

Username	
Password	
Group	power user 🗸

Advanced	Browse log

- 4. Insert the username of this new user.
- 5. Insert the password of this new user.
- 6. Choose the group of this user.
  - **Power user**: Power user can do all the settings except the **Network Settings**, **RAID Settings**, and **Management function**.
  - User: User just can change his/her password and do the live view and playback functions.
- **Guest user**: User can do live view and playback function only.
- 7. Select the live view cameras which this user can access.
- 8. Select the playback channels which this user can access.
- 9. Check whether this user can backup or delete recorded data.

- 10. Check whether this user can browse log or not.
- 11. Click the **Create New User** button to finish it.

The Administrator will be the only user who can use all of the functions. There is a default administrator account in the system, and you cannot create neither another "Administrator" account, nor another username named "admin".

### 2.6.3 Modify User Information

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click Management / User Management.
- 3. Click the **Modify Users** tab.
- 4. Click one of the users in the User List on the bottom of this page.

5. In the confirmation box, click the **OK** button.

### 2.6.6 Online License Activation

There are two types of license currently, camera license and POS license. With the camera license upgrade, the 4ch-device will possess up to 8ch capacity, while the 6ch-device will possess up to 16ch. With the POS license upgrade,

#### users can use **POS function**.

There are two ways to activate license, online and offline.

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click Management / License Management.

2014-01-16	11.00.15	User Login	info	(Localhost) is logging in to Live Streaming		

There are four kinds of event which will be listed on this page.

- System Log: The log information of the operations to your unit, such user access information, as reboot or shut down.
- **NVR Event Log**: The log information of the "Event & Action Management", such as motion detection or camera connection lost.
- **Export and Backup Log**: The log information of the track of video data exported and backup.

The NVR Event Log will be recorded only if event is selected on <u>Event & Action</u> <u>Management</u> page. As for user access information, please go to <u>Network Service</u> to check **Log Access** box to enable this function.

You may click on 🖙 to view the event playback in a separated page at **NVR Event Log** page(Internet Explorer only).

### 2.6.11 Save Unit Configuration

Save configuration can let you save the settings of this unit. These settings can be applied to other units, which will let you set other units more easily.

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click Management / Save / Load Configuration.
- 3. Click the **Save Configuration** tab.

Save Configuration	Load Configuration	
Save Configura	ation	
Sana comigai		
<b>·</b>		
J	o save the configuration of Camera Settings, Recording Settings, Event & Action Settings, E-Mail Settings	
Click the Save button to		

- 4. Check the box of **E-Map Settings** or **POS Settings** if you want to keep the configuration.
- 5. Click the **OK** button.
- 6. The configuration file will be generated into the chosen folder.

### 2.6.12 Load Unit Configuration / Default Settings

Load configuration can let you apply another unit's settings to the current unit; Load Default Settings will revert all of the unit's settings back to the default factory settings.

- 1. Click Management / Save / Load Configuration.
- 2. Click the **Load Configuration** tab.

Save/Load Configuration				
Save Configuration	Load Configuration			
🖉 Load Default Settings				
Click the Load button to load default factory settings. Uncheck the following box if you want to keep the network settings.				
Optional	Vetwork Settings			
Load				
Click the Load button to load the configuration of Camera Settings, Recording Settings, Event & Action Settings, E-Mail Settings and Server Settings.				
File Name	Browse			
Optional	E-Map Settings POS Settings			
Load				

- 3. Follow the direction to Load Default Settings or Load Configuration. For the former, uncheck the box of Network Settings to keep the IP address; for the latter, check the box of E-Map Settings or POS Settings if you want to restore the configuration.
- 4. Click the **Load** button.

5. A confirmation dialog pops up. Click the **OK** button to begin to load the settings into your unit.

If there is POS database existed in the unit, loading configuration with different POS application config is likely to make the original POS data unsearchable.

If the saved configuration is without E-map or POS settings, selecting loading configuration with E-map/POS settings will lead you get the default. The original E-map/POS settings (if any) are covered and untraceable.

**User account and privilege** will be kept even if loading default settings, while camera settings, recording schedule, event & action settings, Email setting and server settings won't be. **RAID information** will always be kept whether loading default settings or loading configuration.

# 2.7 System

## 2.7.1 View System Information

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click System / System Information.

System Information					
System Information					
information					
Operating System	Linux				
NVR Version	01.00.0004.0178				
Device Pack Version	02.07.0000.0020				
CPU	ARMv7 Processor rev 0 (v7I)				
MAC Address 1	20:12:10:29:14:53				
MAC Address 2	20:12:10:29:14:54				
CPU Temperature	38.000 °C				
System Fan Speed	0 RPM				
Locate	Locate				

The system information includes the following items.

- **Operating System:** Embedded Linux
- NVR Version: NVR system version
- **Device Pack Version**: Camera package version
- **CPU**: CPU model number
- MAC Address: MAC address of this unit

- CPU Temperature
- System Fan Speed
- Locate: Click to trigger the buzzer to let you know where the unit is

### 2.7.2 Smart Fan Control

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click System / System Settings.
- 3. Click the Fan Control tab.

an Control	Buzzer	APC UPS	
👌 Fan Coi	ntrol		
	CPU T	emperature	32.000 °C
	System	Fan Speed	2652 RPM
		Setting	⊙ Enable ○ Disable

- 4. Check the **Enable** or **Disable** option.
- 5. Click the **OK** button.

### 2.7.3 Buzzer Configuration

There is a buzzer in the unit. When the unit finishes booting or when a problem is detected, this buzzer will sound. This buzzer is enabled by default. You can disable/enable this buzzer with the following steps. (We recommend that this buzzer should be enabled.)

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click System / Settings.
- 3. Click the **Buzzer** tab.

4. Check the **Enable** or **Disable** option.

5. Click the **OK** button.

### 2.7.4 UPS Setup

This feature enables you to tell your unit how long to run on APC Uninterruptable Power Supply (UPS) battery power and when to shut down, after power failure.

- 1. Attach the APC UPS to one of the unit's USB ports.
- 2. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 3. Click System / Settings.
- 4. Click the **APU UPS** tab.
- 5. Check one of the options:

an Control Buz	zer APC UPS			
Information				
	Manufacturer	APC		
	Product Name	Smart-UPS 3000 FW:655.18.D USB FW:7.4		
	Contract Management	JS0939022759		
	Serial Number	JS0939022759		
	Service Status	0N		
🔗 Power Failur O	Service Status			
0	Service Status re Action Disable			

- **Disable**: Run until the UPS battery is depleted
- System shutdown as power of the UPS remains \_\_\_\_\_ %: Run until the UPS battery remains this percentage.
- System shutdown as power of the UPS remains \_\_\_\_\_ min.: Run until the UPS battery remains the certain period of time.
- 6. Fill in the specific value if you choose the last two options.
- 7. Click the **OK** button.

### 2.7.5 Upgrade the System

1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.

- 2. Click System / Upgrade.
- 3. Click the **Firmware Upgrade** tab.

System Upgrade	And in case of the local division of the loc
Firmware Upgrade Upgrade Notification	
🧭 Upgrade	
Current NVR Version	01.00.0004.0178
Current Device Pack version	02.07.0000.0020
Select file	Browse
OK Cancel	

- 4. Browse the FW for upgrading and click the **OK** button.
- 5. A confirmation dialog pops up. Click the **OK** button to start upgrade process.
- 6. After upgrade, the system will restart. You need to re-access the unit again after this.

Please do not power off the server while system upgrading.

When upgrading firmware, please make sure the network is stable and the bandwidth is more than 2 Mbps.

Recommend to stop recording while upgrade firmware via web page.

### 2.7.6 Upgrade Notification

Enable this function to allow us to notify you automatically when there are firmware updates (Recommended). This will help keep your system up to date. The updater will also collect info from your system that will be used for future system improvements.

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click System / Upgrade.
- 3. Click the **Upgrade Notification** tab.

- 4. Check the option if you agree to be bound by the agreement.
- 5. Click the **OK** button.

#### 2.7.7 System Date and Time Setup

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click System / Date/Time.

Date/Time	
Setup	
🕑 Time Zone

- 3. Choose the time zone.
- 4. Configure the year, month, day and time manually, or enable NTP server to synchronize time automatically. When NTP server enabled, the date/time settings will be grayed out.
- 5. Check the **Adjust clock for daylight saving changes** option and select the time change of daylight saving time in your location. Choose the start time and end time of recurrence.
- 6. Click the **OK** button to restart system to activate the changes.

#### 2.7.8 Restart the Unit

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click System / Reboot/Shut down.

Reboot/Shut	down
Options	
🕑 Options List	
Options	Reboot O Shut down
OK Car	icel

- 3. Check the **Reboot** option.
- 4. Click the **OK** button.
- 5. A confirmation dialog pops up. Click the **OK** button to reboot the unit.

The restart procedure runs automatically. When the unit is fully online:

- The System Status LED turns blue.
- The buzzer beeps one time (if the buzzer is enabled).

During system restart, none of your files will be accessible from your desktops/laptops.

### 2.7.9 Shut down the Unit

The only time you need to shut down the unit is to replace the disk drive cooling fan or the power supply. During and after the shutdown, none of your files will be accessible from your desktops/laptops. There are two ways to shut down the unit.

#### • Shut down by Software

- 1. Open Internet Explorer, Windows Chrome or Mac Safari and log in to the unit.
- 2. Click System / Reboot / Shut down.

Reboot/Shut	down
Options	
🕑 Options List	
Options	🔿 Reboot 💿 Shut down
ОК Са	ncel

- 3. Check the **Shut down** option.
- 4. Click the **OK** button.
- 5. A confirmation dialog pops up. Click the **OK** button to shut down the unit.
- Direct Shutdown

- 1. Press and hold the power button for 2 seconds and release your hands when the buzzer is beeping once.
- 2. System will begin the shutdown process, which takes about 30 seconds to few minutes depends on number of recording channels and other factors.

If the system is crashed and stocked, you can press the power button and hold it for 10 seconds to force to cut off the power directly. We don't recommend to do it if the system work properly.

# 3.POS

### **3.1 Introduction**

### **3.1.1 System Introduction**

NUUO POS, a Point of Sales Systems based on NUUO NVR/DVR/NVDR/NVRmini 2/NVRsolo, provides financial transaction's surveillance solution in one central system. The architecture is as below; POS transaction data flows to NVRmini 2/NVRsolo by Ethernet. Each Cash Register with an external receipt printer is connected by DB9 cable. The transaction information delivered in R232 format can be converted to Ethernet through SCB-C31A POS data capture converter.

#### **Definition of Terms**

Terms		Definition
POS	Original	Original data from POS. Usually with a lot of
Data		symbols and no line feed.
POS		Filtered result by user-defined tag-filter.
Transa	ction	

#### **Product Specification**

	NUUO POS Box
	SCB-C31A
Input	RS232
Output	Ethernet
DC In	DC +10V to +15V
Power consumption	500 mA
Operating	-20 to 65℃
Temperature	

<b>Operating Humidity</b>	0-90 % Non-Condensing
Baud Rate	110 bps to 230.4 kbps
Data Bits	5, 6, 7 or 8
Stop Bits	1, 1.5 or 2
Parity	None, Even, Odd, Mark, Space
Flow Control	None, RTX/CTS, XON/XOFF, DTR/DSR

### 3.1.2 Hardware Installation – SCB-C31A

To connect Cash Register, Printer, and SCB-C31A POS data capture converter together, please follow below steps:

- Step 1: Please refer the user manual to setup Cash Register and printer.
- Step 2: Using a "Y-shape" DB-9 cable, one DB-9 female connect to POS system and one DB-9 male connect to the receipt printer Y-shape (provided by Printer vendor).
- Step 3: Using another DB-9 female connect to SCB-C31A POS Data Capture R232/Ethernet converter with Null modem.

There are two kinds of serial cable: Straight pass-through and Null-Modem. The connection between SCB-C31 POS Data capture box and Y-cable must be null modem (in package).

- Step 4: Check the system switch of the SCB-C31A is switched to OFF-OFF position.
- Step 5: Connect SCB-C31A with power source.
- Step 6: Connect SCB-C31A with internet port by RJ45 LAN cable.

The LED Indicators: LINK LED: Ethernet cable connection and data active. RUN LED: System is ready (Blinking). Serial 1: Transiting/Receiving Indicator.

### 3.1.3 Software Installation – SCB-C31A

Step 1: Use IE-browser to setup SCB-C31A, the default IP address is **192.168.1.1** 

🖉 Server Page - Microsoft	nternet Explorer	
Eile Edit View Favorites	<u>T</u> ools <u>H</u> elp	27
Addre:s 🗃 192.168.1.1		🛩 🄁 Go
		<u>^</u>

Step 2: Setup IP address and password in **Server** page, and click the **Save** button.

Each time you switch the page of the web, please click Save at first. If you leave this page without saving, all changes will be ignored.

Step 3: Setup Password if needed. Password is only using to activate a security feature on the serial server. Once a password is entered it will be required to access the menu and make change of configuration when access.

Please write down the Serial number and MAC address, these two parameters are necessary when user forget your password.

- Step 4: Setup according to your POS or Cash Register. Usually all devices are default setting, you can reserve your time to pass this step.
- Step 5: Please **restart/reset** the box after changing configurations to active setup.

To reset the unit manually apply power, insert a small plastic tool, and press lightly depressing reset located between the switch. Hold for 3 seconds and release. The Link and Run light will go out and turn back on. The SCB-C31A will revert to the last setting.

Every time you change the configuration of SCB-C31, please check above setting, especially maximum connection and Remote IP address to avoid connection fail.

#### 3.1.4 Connection via TCP Client

If the cash register possess network, please install system according to following diagram and purchase a POS license to activate this function.

### 3.2 Software Setup

#### 3.2.1 Activate POS License

If you are not the SCB-C31 user, you need to activate POS license before starting the following settings, please refer to **License Activation** for details.

### 3.2.2 NVR POS Setting

1. Open Internet Explorer and log in to the unit.

POS setting is only available on Internet Explorer.

### 2. Click POS & I/O / POS Settings.

R POS Setting				
R POS Setting				
POS Settings				
POS Name	Address	Serial Box	Tag Filter	
No records found.				
Settings				

3. Click the **Settings** tab to set POS application.

- **Data Source**: List of all the data sources.
  - Insert: Click to insert POS and do the POS settings. See <u>Insert</u>.
    <u>POS Setting</u> for details.
  - Delete: Click to remove the selected POS from the list. See <u>Delete</u> <u>POS Device</u> for details.
  - Configure: Click to configure the selected POS and modify the POS settings. See <u>Configure POS Setting</u> for details.
- **POS info**: The setting information of the selected POS on this window.
  - > Name: Name of the POS data source.
  - > IP: IP of the POS data source.
  - Serial Box: The serial box data source used.
  - Tag Filter: Tag type to filter the data from POS. See <u>Tag Filter</u> for details.

• Associated Cameras: List of all the associated cameras of the selected POS.

4. Click the OK button to finalize the modification.

#### **3.2.3 Insert POS Setting**

- 1. Click 🛍 **Insert** button to open the **POS Setting** window.
- Set up basic data source, including Name, Model, IP address, and Port. There are three types of models.

- **SCB-C31**: The device possesses one POS license, and should be equipped with the cash register not working as TCP server.
- **SCB-C31A**: The difference from SCB-C31 is not possessing one POS license, so user should activate POS license.
- **TCP Client**: Cash register possesses with network, so no need to have SCB-C31A as a converter. POS license is needed.
- 3. After setting, click **Test Connection** to test POS device connection.

POS Setting	
Data Source Setting Name: Model: SCB-C31 • IP Address: Port: 4000 Test Connection	Miscellaneous Record POS Transaction Display on Video Preview Always Display C Last for 10 seconds
Tag Filter Default New Edit Delete	Import Export
Associated Cameras	
	<b>splay Region Definition</b> Default C User Define
	OK Cancel

- 4. Set up Miscellaneous options, including **Record POS Transaction** and **Display on Video Preview**.
  - **Record POS Transaction**: Select this checkbox to record POS transaction data. Users are allowed to search the POS data.
  - **Display on Video Preview**: Select this checkbox to display POS transaction overlay on associated camera live video. Two types of transaction data display time:
    - > Name: Name of the POS data source.
    - Always: Keep transaction data on video until receiving next transaction date.
    - Last for <u>seconds</u>: Each transaction data only lasts on video for seconds after receiving the last data of transaction.

- 5. Select **Tag Filter**. See **<u>Tag Filter</u>** for details.
- 6. Select the camera of **Associated Cameras** to display POS transaction data overlay on live video.
- 7. Set up display area for each camera video in **Display Region Definition**.
- **Default**: The default display area is in the upper left corner of video image.
- User Define: Enable User Define, and define display area by dragging rectangle
- 8. Click the  $\mathbf{OK}$  button to save.

### **3.2.4 Delete POS Device**

- 1. Choose POS device.
- 2. Click 🎽 **Delete** button to remove this POS device from the system.

### 3.2.5 Configure POS Setting

- 1. Choose POS device.
- 2. Click domination 2. Click domination of the POS Setting window.
- 3. Refer to **Insert POS Setting** to modify configuration.

### 3.3 Tag Filter

The original transaction data from POS system is hard to read. Users can define filters to make the POS strings meaningful. The system also provides a simple default tag filter to filter out same common EPSON commands, users can base on this default tag filter to edit their customized filters.

### 3.3.1 Add New Tag Filter

- 1. Click **Insert** button or choose a device and click **Configure** button to open the **POS Setting** window.
- 2. Click **New** to open tag filter window.
- **General**: Name of Tag Filter and Connect button.
- **Original Data**: Original transaction data from POS device.
- Filtered Data: Filtered data after definition.
- Filter Functions: Tool used for defining filter type.
- Filter List: List of all filters.
- **Data Tools**: Clear/import/export buttons to clear/import/export the

original and filtered data.

• Filter Tools: Upper/down buttons to arrange the priority of each filter; remove button to remove the filter from list.

Tag Filter						
General Ge	neral	Connect				
Transaction Definition Original Data:	Data Tools 🗑 🛧 🛧 🖢					
Original Data		d Data				
Omit Substitute Add New Line	Cash Drawer Opened	Filter Tools				
Start End Filter F	unctions	☆ ♣ 💥				
Filter Substitution						
Filter List						
Encoding: Default						
		OK Cancel				

- 3. Enter name of this tag filter.
- 4. Click **Connect** button to capture POS transaction data from POS device. The original transaction data will be shown on the left window.

- 5. Data Tools
  - Clear: Remove data from Original Data window and Filtered Data window.
  - Import: Reload exported binary data.
  - Export: Capture and export original binary data.
- 6. Start to edit tag filters. Click and drag to select text from Original Data window, and then use the below six buttons to define filters. The filtered transaction data will be shown on the right window.

riginal Data:	Filtered Data: 🗱 🏂 🏦
==== WELCOME TO NUUO MARKET =====<0d><0a><0d	===== WELCOME TO NUUO MARKET =====
	2009-05-01(五) 12:06:33
	APPLE JUICE \$31 TX
	ORANGE JUICE \$31 TX
	COKE \$31 TX
	TOTAL \$150
	THANK YOU VERY MUCH!

 Omit: Neglect the selected text which is meaningless or not important. The text will disappear on the right window.

• **Substitute**: Use another word(s) to replace the selected text. The system will pop up a substitution panel for replacing word(s) users want. The replaced text will be shown on the right window.

• Add New Line: Define the selected text as the symbol for changing to new line. The result will be shown on the right window.

• **Start**: Define the selected text as the symbol for transaction beginning. The filtered data will be separated line as below.

Transaction Definition		🖌 🖌 🔶
Original Data:	Filtered Data:	<b>~</b> • •
===== WELCOME TO NUUO MARKET =====<0d><0a>		~
< <u>{0d&gt;&lt;8a&gt;</u>	NUUO MARKET	

 Cash Register Opened: Define the selected text as the symbol for opening cash register. The filtered data will be shown the <Cash Drawer Open> mark as below.

• End: Define the selected text as the symbol for transaction ending. The filtered data will be separated line as below.

- 7. Filter Tools
  - >  $1 \oplus 10^{\circ}$  Move a tag filter up; the upper filter will be operated earlier.
  - Down: Move a tag filter down; the lower filter will be operated later.
  - Delete: Remove a filter from this tag filter list.

Filter	Substitution

WELCOME TO	<transaction start=""></transaction>	
TOTAL<09><09>\$150	<cash drawer="" open=""></cash>	
VERY MUCH	<transaction end=""></transaction>	

8. Click the **OK** button to save.

### 3.3.2 Edit Tag Filter

- 1. Select Tag Filter name from drop-down menu.
- 2. Click Edit button.
- 3. Configure the Tag Filter window.
- 4. Click the **OK** button to save.

### 3.3.3 Delete Tag Filter

1. Select Tag Filter name from drop-down menu.

2. Click **Delete** button to delete it.

### 3.3.4 Import/Export Tag Filter

- 1. Click **Import/Export** button and select Import/Export URL.
- 2. Click **Open/Save** to Import/Export Tag Filter.
- 3. After importing tag filters, users can simply select tag filter from drop-down menu without editing new tag filter.

### 3.4 POS Display Font

The system allows users to set up the fonts of POS transaction data on live view video and playback video.

### 3.4.1 Live View

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Live View**.
- 3. Click the **General Setting** button to open **Live View Setting** window.

4. Select the font, font size, font color and background for the POS transaction data overlaid the video.

- 5. Select a POS device(s) from the POS list.
- 6. Set up Start Time and End Time in **Data Time Period** section.
- 7. Enter the keyword you want to search.
- 8. Click the **Search** button, the results will be shown in Transaction table.
- 9. Select an item from Transaction table, the transaction detail will be shown in the table of lower right corner, and the recorded video of associated camera will be shown in the upper right corner.
- 10. Select the checkbox of **Search within result**, and enter a keyword, you can search the data within the results.

### 3.5.2 Search POS Transaction Data through Playback System

- 1. Startup > NUUO NVRsolo > Playback System.
- 2. Click the **Open Record** button to open **Data Time Search Dialog** window.
- 3. Click the **Remote Server Site**  $\oint$  icon on the top of the window to select the server users want to access.
- Follow the step 4 through 10 of <u>Search POS Transaction Data by</u> <u>Playback</u> to search the data.

### 3.6 Playback Video with POS Data

Enable POS overlay in **Setting** window to view recorded video with POS transaction data (Refer to **POS Display Font**). If the option is enabled, the system will auto display transaction data when playing recorded video. There are two modes to select video period.

### 3.6.1 Select Period by POS Search

### 1. Refer to **POS Transaction Data Search**.

2. Select the transaction data from the result list, and click **OK**.

Date Time	Metad	Transaction		
2012/09/20 11:39:41	-Cashier	2012-09-20	11:39:39 C	
2012/09/20 11:39:42	-Cashier	2012-09-20	11:39:40 C

4. Click **OK** to playback videos.

### **3.6.2 Select Period by Data & Time through Playback**

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Playback** button.
- 3. Click the **Open Record** button to open **Data Time Search Dialog** window.
- Highlight the video clip you want to review by left-clicking and dragging the time period. You may also utilize the Start Time and End Time in **Date Time Period** section after choosing cameras.
- 5. Click **OK** to playback videos.

### 3.6.3 Select Period by Data & Time through Playback System

- 1. Startup > NUUO NVRsolo > Playback System.
- 2. Click the Open Record button to open Data Time Search Dialog

window.

- 3. Click the **Remote Server Site**  $\oint$  icon on the top of the window to select the server users want to access.
- Highlight the video clip you want to review by left-clicking and dragging the time period. You may also utilize the Start Time and End Time in **Date Time Period** section after choosing cameras.
- 5. Click **OK** to playback videos.

### 3.7 Backup Video with POS Data

There are three ways to backup video with POS transaction data.

### 3.7.1 Backup through Internet Explorer

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Open Record** button to select data.
- 3. Click the **Backup** button.

🔄 Backup Dialog
Date Time Period
Start Time: 2012/09/20 + 11:18:00 +

Backup IVS Event Log
OK Cancel

- 4. Check the **Backup POS Transaction** option.
- 5. Set the Start Time and End Time you want to backup.

- 6. Select the cameras you want to backup.
- 7. Select the directory you want to save the backup data.
- 8. Click the **Backup** button.
- 9. The system will then begin backup process automatically.

### 3.7.2 Backup through Playback System

- 1. Startup > NUUO NVRsolo > Playback System.
- 2. Click the **Open Record** button to select data.
- 3. Click the **Backup** button.
- 4. Check the **Backup POS Transaction** option.
- 5. Set the Start Time and End Time you want to backup.
- 6. Select the cameras you want to backup.
- 7. Select the directory you want to save the backup data.
- 8. Click the **Backup** button.

### 3.7.3 Backup through Backup System

Please refer to step 1 to 14 of the content of **<u>Backup and Delete Records</u>**, and check the **Backup POS Transaction** option.

# **4.I/O**

### 4.1 Introduction

### 4.1.1 System Introduction

NUUO provides remote I/O solution for NVRsolo by connecting SCB-C31 with NUUO I/O Box SCB-C24/26/28. Refer to the below architecture, I/O device is connected directly with I/O Box, and input/output signal delivered in RS485 format are converted to Ethernet through SCB-C31. NVRsolo can use the signals to do more sophisticated setup, such as starting recording when input triggered, triggering output as an event happened, and much more.

### 4.1.2 HW Installation

SCB-C24/26/28 must work with SCB-C31 (Ethernet-RS485 converter). Further, **the C31 Box cannot be used for POS and converter at the same time, and one C31 Box can be paired with one NVR unit only.** Please follow the steps below to configure the devices.

Step 1: Check the system switch of SCB-C31 is switched to OFF-OFF position.

Step 2: Connect SCB-C31 with power source.

Step 3: Connect SCB-C31 with internet by RJ45 LAN cable.

Step 4: Connect I/O Box with power source.

Step 5: Connect SCB-C31 and I/O Box with cable, positive connection

(TX+/D+ and DATA+) and negative connection (TX-/D- and DATA-). Take SCB-C31 with I/O Box SCB-C24 for example as below.

Multiple I/O Boxes can be connected to a single SCB-C31. However, series connection of I/O boxes is forbidden. Furthermore, the default ID for each I/O Box is the same. Please follow the direction to setup I/O Box one by one.

### 4.1.3 Software Installation – SCB-C31

Step 1: Open Internet Explorer to setup SCB-C31. The default IP address is 192.168.1.1.

🕘 Server Page - Microsoft Internet Explorer	
<u>Eile Edit View Favorites Iools Help</u>	A.
Address 🕘 192.168.1.1	💌 🄁 Go

Step 2: Setup IP address and port.

1. Static IP Address

2. **Server Listening Port**: The default port is 4000, which is not the port for setting page, but for signal transmission.

Serial Settings

	I HIIT OLO OPEIOCO

Step 3: Click the **Apply** button to activate configuration.

Due to the stability of data transmission, one SCB-C31 can be paired with one NVR unit only.

### 4.1.4 Software Installation – SCB-C24/26/28

The default ID of I/O Box is identical. To avoid the conflict between Boxes, please connect only one Box with SCB-C31 and execute the setup application to change the ID from the default value (1).

 Execute IOConfig.exe, type in the IP address and port of SCB-C31, and click the Scan button.

ouning	options	Scanning results		
Configura	tion via C31	Address / ID	Name	Baud rate
P:	192.168.8.95			
Port:	6666			
Starting	0	New address:	0	Update device

IOConfig.exe starts scanning the ID from 0 to 255, and it may take around a minute to finish scan.

2. When the I/O Box is discovered, click on the item and change the ID from the **New Address** field. Click the **Update device** button to activate the settings.

	options	Scanning results		
Configura	ation via C31	Address / ID	Name	Baud rate
P:	192.168.8.95	1	C26	9600
Port	6666			
Starting	8	New address:	1	Update device

3. Scan again to make sure the configuration is validated. In this case, we changed the ID to 10, so we can modify the number of "Starting address" to 10 to save the searching time.

canning	options	Scanning results		
Configura	ation via C31	Address / ID	Name	Baud rate
IP:	192.168.8.95	10	C26	9600
Port:	6666			
Starting address:	12 Scan	New address: New baud rate:	10 9600 -	Update device

4. Refer to the **<u>HW Installation</u>** section to connect other I/O Box and repeat the steps 1 through 3 above to configure more I/O Boxes.

### 4.2 Software Setup

### 4.2.1 Add I/O Box

- 1. Open Internet Explorer and log in to the unit.
- 2. Click POS & I/O / I/O Settings / I/O Box Settings.
- 3. Enter the information of I/O box.

I/O Box Setting	s I/O Pin Se	ettings					
😸 I/O Box S	ettings						
	Device No.						
D	evice Name						
	Device Type	SCB-C31 + S	CB-C24 🔻				
	IP Address			Por	t		
	ID	Addr:000 -					
Create							
🎯 I/O Box L	ist						
No.		Name	Туре	IP Address	Port	ID	Delete
1	C Block		SCB-C28	192.168.8.2	4000	Addr:000	0
Save	Reset						

- **Device No:** The unique ID system distributes in sequence automatically.
- **Device Name**: The name of the I/O box.
- **Device Type**: The types of I/O box, including SCB-C24, SCB-C26, and SCB-C28.
- **IP Address**: The IP Address of SCB-C31.
- **Port**: The transmission port of SCB-C31.

- **ID**: The ID of the I/O box.
- 4. Click the **Create** button, and the information will be updated in I/O Box List.
- 5. Repeat steps 3 and 4 to add more I/O boxes in the list.
- 6. Click the **Save** button to activate the settings. Meanwhile, system will distribute an unique ID to each device.

### 4.2.2 Modify I/O Box Information

- 1. Open Internet Explorer and log in to the unit.
- 2. Click POS & I/O / I/O Settings / I/O Box Settings.
- 3. Click the I/O box which you want to modify from the list.
- 4. Modify the information of this I/O box, and click the **Modify** button.
- 5. Click the **Save** button to activate the settings.

### 4.2.3 I/O Pin Setting

- 1. Open Internet Explorer and log in to the unit.
- 2. Click POS & I/O / I/O Settings / I/O Pin Settings.
- 3. All input and output pins are shown in this page, including the ones from cameras and I/O boxes. Check the box to enable a pin (defaulted), and type a name in the field for each I/O pin.

j I/O Pin Settings				
Device Name	I/O Pin	Name	Output Duration	Associated Camera
Location 1	Input #0			Location 1 -
Location	Output #0		N/A 👻	
	Input #0	Gate		Location 1 -
	Input #1	Lobby		N/A 🔻
	Input #2	Ground		N/A 🔻
	Input #3			N/A 🔻
I/O BOX 51001(C Block)	Output #0		10 sec. 🔻	
	Output #1		N/A 👻	
	Output #2		N/A 👻	
	Output #3		N/A -	

4. For input pin, you can select an associated camera for it, which will be the communication media for server and client. (e.g. when an input was

triggered and pushed a notification to mobile, users can playback the videos of its associated camera.)

- 5. For output pin, you can configure its duration time to control how long output acts after it's triggered. The duration range is 3 sec~60 sec. N/A stands for unlimited.
- 6. Click the **Save** button.

If the box of I/O pin is unchecked, this pin won't be shown on relative application pages. In other words, you cannot do any setting/operation with this pin. See details in next section.

### 4.3 Relative Configuration and Application

### 4.3.1 Record on Input Trigger

Refer to **Recording Schedule / Event Setup**.

### 4.3.2 Input and Responding Actions

Refer to **I/O Box Input and Responding Action Setup**.

### 4.3.31/O Control Panel in Live View

Refer to Live View Control Panel.

## **5.Live view**

There are two ways to execute the live view function: with Internet Explorer or with the **Remote Live Viewer** application.

### 5.1 Internet Explorer

### 5.1.1 Live View Control Panel

- **PTZ Camera Control**: You may control the camera view by using the PTZ camera control panel to adjust the camera's view. This is only available with cameras that support the PTZ function.
- Set Preset Point / Go to Preset Point: Adjust the camera view and click the *December 2* button to set up this view as preset point. Repeat the process to add more preset points. Click the *December 2* button to see the preset view.
- **Zoom**: Click the + or button to zoom in or zoom out the view.
- Play / Stop / Drop: Select a camera / video and click this button to play/stop/disconnect a particular channel.
- Information Display Window: Display video information including

server name, video current status, and bit rate for a selected channel.

- Start Menu > E-Map: Upload map and drag camera or I/O on it to track device location and alarm status with instant response when an event occurred. See details in the chapter of <u>E-Map</u>.
- **Start Menu > I/O Control Panel**: Utilize I/O device function remotely. User can remotely adjust the Output Pins by turning it on or off.

	🧃 IO Devices	
Click to turn on/off the "Output" pins	Servers: 192.168.4.223	Show name

- **Playback**: View playback video remotely.
- Auto Scan: Activate auto scan to rotate the channels on the display screen. For instance, you may select to show only 4-split screen on the liveview, while connecting 16 channels to the system. With auto scan function, you are able to see all 16 channels by turns.
- Layout: Click to change the multiple-split layout.

You can right click on the camera screen to enable the following function.

	Enable Audio	
	Enable Digital PTZ Fisheye Lens Setting	
	Fix Aspect Ratio Stream Profile	
	Snapshot Toggle Fullscreen	

- Enable Move: Adjust the current view of camera which supports PT function by dragging the 
   the button on the display screen.
- Enable Digital PTZ: Click the + or button to zoom in or zoom out the view. The lower right square flashing on the video grid indicates the correspondent view of the camera.
- Fisheye Lens Setting: Select the mode of lens. There are four modes for Generic Dewarp, including Original, Rectilinear mode, Quad mode and Dual-view panorama mode; four modes for ImmerVision, including Original, PTZ mode, Quad mode and Perimeter mode; and other four modes for Vivotek Fish Eye, including Original, Rectilinear mode, Full-view panorama mode, Dual-view panorama mode. Type of modes depends on lens location.
- **Stream Profile**: Select the stream profiles, original, low, minimum.
- **Enable Audio**: Enable audio on active channel(s).
- **Snapshot**: Select the snapshot function to capture a specific video image immediately.
- **Toggle Fullscreen**: Select it to view cameras with full screen. Press "Esc" or right click un-select full screen to go back to the original view.

Also, right click on camera list to duplicate and connect/disconnect designate cameras, and do other functions.

Duplicate Camera
Connect
Disconnect
Login Server
Logout Server
Connect All
Disconnect All

- **Duplicate Camera**: Select the duplicate camera function to create multiple views. The duplicated camera will be shown with green indicator as the right picture. Combine this function with digital PTZ, users are allowed to enlarge different spots and view them in different channels without failing to record the whole view.
- **Connect / Disconnect**: Click to connect or disconnect the designate camera.
- Login / Logout Server: Click to login or logout.

• **Connect All / Disconnect All**: Click to connect or disconnect all cameras.

## 5.1.2 Live View Setting

- 1. Open Internet Explorer and log in to the unit.
- 2. Set the cameras.
- 3. Click the **Live View** button on the top of the page.
- 4. Select a camera(s) from the camera list on the right and then drag it to where you wish the image to be displayed.

When running Internet Explorer, do not use the function "Open in New Window". Using this function may cause Internet Explorer to become unstable.

## 5.1.3 General Setting

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Live View** button on the top of the page.
- 3. Click the **General Setting** button.
- 4. Click the **General** tab.

😰 LiveView Setting	×

- 5. Check the **Enable audio on active channel** option to enable audio streaming on active channel. This function synchronizes with right click on camera to enable audio.
- 6. Check **Synchronize video frames** to avoid the tearing problem occurring in video display while increasing the CPU loading.
- 7. Click the **OK** button.

#### 5.1.4 Stream Profile Setting

Select the preferred stream type of each camera as default live view profile.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Live View** button on the top of the page.
- 3. Click the **General Setting** button.
- 4. Click the **Camera** tab.

🕼 LiveView Setting		×

		OK Cancel

- Adjust the stream profile of every camera with stream profile enabled in the <u>setting page</u>.
- 6. Click a camera and select its stream profile, and click the **Copy to...** button to apply this profile to other channels.
- 7. Click the **OK** button.

## 5.1.5 OSD (On-screen display) Setting

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Live View** button on the top of the page.
- 3. Click the **General Setting** button.
- 4. Click the **OSD** tab.

🕼 LiveView Setting		×

- 5. Check **Show recording status** to show the crystal ball with recording status on monitor display.
- 6. Check **Show camera event** to display the words of detected camera event on the correspondent screen.
- 7. Check the **Enable playing sound on event** option. Select sound file, default sound or user defined sound (.wav), and define the cycle.
- 8. Check **Popup system event** to pop up system event message dialog as a warning when a system event occurred.
- 9. Click the **OK** button.

The "playing sound" function only activates on event, which means you have to setup camera motion, camera I/O and I/O Box I/O as an event. Refer to **Event & Action Management** to do the setting.

## 5.1.8 Set up Joystick Control

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Live View** button on the top of the page.
- 3. Click the **General Setting** button.
- 4. Click the **Joystick** tab.

• **Function**: You can choose the function from the drop-down menu for the button of the joystick.

- **Parameter**: Choose the preset point from the drop-down menu.
- **Default**: Click to back to default setting.
- **Import**: Click to import the settings.
- **Export**: Click to export the settings.
- 5. Click the **OK** button.

# 5.2 Remote Live Viewer Application

## 5.2.1 Remote Live Viewer Application Control Panel

Start Monitor Playback Live View Setting

- **PTZ Camera Control**: You may control the camera view by using the PTZ camera control panel to adjust the camera's view. This is only available with cameras that support the PTZ function.
- Set Preset Point / Go to Preset Point: Adjust the camera view and click the button to set up this view as preset point. Repeat the process to add more preset points. Click the button to see the preset view.
- **Zoom**: Click the **+** or **-** button to zoom in or zoom out the view.
- **Minimize**: Minimize the Remote Live Viewer window.
- **Exit**: Shut down the application.
- Play / Stop / Drop: Select a camera/ video and click this button to play/stop/disconnect a particular channel.
- **Information Display Window**: Display video information including server name, video current status, and bit rate for a selected channel.
- **Start Monitor > Monitor**: Select Open Monitor to append monitor to view more live videos on multiple monitors.

- Start Monitor > E-Map: Upload map and drag camera or I/O on it to track device location and alarm status with instant response when an event occurred. See details in the chapter of <u>E-Map</u>.
- **Start Monitor > I/O Control Panel**: Utilize I/O device function remotely. User can remotely adjust the Output Pins by turning it on or off.

	🧃 IO Devices			
Click to turn on/off the "Output" pins	Servers: DI Input#0 DO Output#0	192.168.4.223	•	Show name

- **Playback**: View playback video remotely.
- Auto Scan: Activate auto scan to rotate the channels on the display screen. For instance, you may select to show only 4-split screen on the liveview, while connecting 16 channels to the system. With auto scan function, you are able to see all 16 channels by turns.
- Layout: Click to change the multiple-split layout.

You can right click on the camera screen to enable the following function.

- Enable Talk: Enable two-way audio. Please insert the microphone properly and switch to main stream to receive the voice from camera side before talking. However, the operator is able to talk to camera side on every stream.
- Enable Move: Adjust the current view of camera which supports PT function by dragging the 
   the button on the display screen.
- Enable Digital PTZ: Click the + or button to zoom in or zoom out the view. The lower right square flashing on the video grid indicates the correspondent view of the camera.
- Fisheye Lens Setting: Select the mode of lens. There are four modes for Generic Dewarp, including Original, Rectilinear mode, Quad mode and Dual-view panorama mode; four modes for ImmerVision, including Original, PTZ mode, Quad mode and Perimeter mode; and other four modes for Vivotek Fish Eye, including Original, Rectilinear mode, Full-view panorama mode, Dual-view panorama mode. Type of modes depends on lens location.
- **Stream Profile**: Select the stream profiles, original, low, minimum.
- **Enable Audio**: Enable audio on active channel(s).
- **Snapshot**: Select the snapshot function to capture a specific video image immediately.
- **Toggle Fullscreen**: Select it to view cameras with full screen. Press "Esc" or right click un-select full screen to go back to the original view.

Also, right click on camera list to duplicate and connect/disconnect designate cameras, and do other functions.

• **Duplicate Camera**: Select the duplicate camera function to create multiple views. The duplicated camera will be shown with green indicator as the right picture. Combine this function with digital PTZ, users are allowed to enlarge different spots and view them in different channels

without failing to record the whole view.

- **Connect / Disconnect**: Click to connect or disconnect the designate camera.
- Login / Logout Server: Click to login or logout.
- **Connect All / Disconnect All**: Click to connect or disconnect all cameras.

## 5.2.2 Unit Connection Setting

- 1. Startup > NUUO NVRsolo > Remote Live Viewer.
- 2. Click the **General Setting** button.

- 3. Click the **Server** tab.
- 4. Insert the unit name.

LiveView S	etting	
General	Server Group Camera OSD Metadata Monitor Display Notification

- 4. Check the **Enable audio on active channel** option to enable audio streaming on active channel. This function synchronizes with right click on camera to enable audio.
- 5. Check **Synchronize video frames** to avoid the tearing problem occurring in video display while increasing the CPU loading.
- 6. Select monitor(s) to run LiveView.
- 7. Click the **OK** button.

## 5.2.4 Camera Group Setting

You can put different cameras into the same group.

- 1. Startup > NUUO NVRsolo > Remote Live Viewer.
- 2. Click the **General Setting** button.
- 3. Click the **Group** tab.

- 4. Log in to all the servers that contain the camera(s) you would like to put into the group(s).
- 5. Click the **Insert** button to create a new group.
- 6. Name this group.
- Highlight the camera(s) that you would like to add into this group and then click the <-- button.</li>
- 8. Repeat step 6 to establish the group.
- 9. Repeat steps 3 through 7 to establish other groups.
- 10. Click the **OK** button.

#### 5.2.5 Delete/ Rename Camera Groups

- 1. Startup > NUUO NVRsolo > Remote Live Viewer.
- 2. Click the **General Setting** button.
- 3. Click the **Group** tab.
- 4. Click the group which you want to modify.
- 5. Click the **Delete** or **Rename** button to remove or rename that group.
- 6. Repeat steps 3 and 4 to modify other groups.
- 7. Click the **OK** button.

#### 5.2.6 Stream Profile Setting

Select the preferred stream type of each camera as default live view profile.

- 1. Startup > NUUO NVRsolo > Remote Live Viewer.
- 2. Click the **General Setting** button.
- 3. Click the **Camera** tab.

- 4. Click the **OK** button.

## 5.2.11 Set up Remote Live Viewer

- 1. Startup > NUUO NVRsolo > Remote Live Viewer.
- 2. Click the unit you wish to access in your remote server list.
- 3. Click the **LOG IN** button to access your unit.
- 4. Select a camera(s) from the camera list on the right and then drag it to where you wish the image to be displayed.

# 6.E-Map

There are two ways to execute the live view function: by Internet Explorer or by **Remote Live Viewer** application.

With E-map, user can easily track the device location and alarm status with instant response when an event occurs. The arrows and lightening icon on E-map represent cameras and I/O devices. These icons will turn red as being triggered by alarms.

There are two modes in E-map application, Edit Mode and Browse Mode.

- **Edit Mode**: The function buttons on the bottom of this E-map dialog will be active. Users can add/edit/delete maps and indicators of devices.
- **Browse Mode**: Users are not allowed to do any configuration but check the map hierarchies and device list to see indicators and related information.

# 6.1 Internet Explorer

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Live View** button on the top of the page.
- 3. Click the **Start Menu** button and select **Open E-Map**.

## 6.1.1 E-Map Control Panel

Map: Select a map you want to show on E-map Window.

• 🧈 Camera: Select the camera to see preview video or mark indicator on

E-map.

- **Digital Input**: Select it to highlight the device with green ring on map and show status on Information Window. If the Digital Input is from IP camera, the preview window will display live video of the camera.
- **Digital Output**: Select it to highlight the device with green ring on map and show status on Information Window. If the Digital Output is from IP camera, the preview window will display live video of the camera.
- Map Indicator: Clicking the indicator will lead to the next map layer. If you want to move to the upper layer, select it by mouse directly or click
   icon on the map.
- Camera Indicator: The indicator of cameras dragged from Device and Map Tree List to show preview video and related information. When event occurs, the color of indicator will turn red.
- Jigital I/O Indicator: The indicator of I/O devices dragged from Device and Map Tree List to show related information. When event occurs, the color of indicator will turn red.
- **Information Window**: The window shows the related information of each indicator.
  - Map: Show map name.
  - > Camera: Show camera name and connecting status.
  - Digital Input: Show Digital Input name and status (0 or 1).
  - > Digital Output: Show Digital Output name and status (0 or 1).

## 6.1.2 Add Map

- 1. Make sure being in "Edit Mode" and all devices are inserted and connected.
- 2. Right click on the Map icon ₩ in Device and Map Tree List to obtain the option menu to add map, or just click the **Add Map** button to configure.

Map Config	×

Map Name:	
	OK Cancel

- 3. Select a map file and insert a name. Click the **OK** button, and then the map you added appears in the Device and Map Tree List.
- 4. The map indicator solution appears on the upper left of map. Drag it to the position you want on appointed map.

- 5. Repeat steps 2 through 4 to add more maps.
- 6. Click the **Upload** button to activate all the settings.

The maximum file size of each map is 500KB. There are 10 layers of map, and the map capacity of each layer is 10.

## 6.1.3 Edit Map

- 1. Make sure being in "Edit Mode" and all devices are inserted and connected.
- 2. Right click on the Map icon **S** in Device and Map Tree List to obtain the option menu to edit map, or just click the **Edit Map** button to configure.
- 3. Repeat step 2 to edit more maps.
- 4. Click the **Upload** button to activate all the settings.

## 6.1.4 Delete Map

- 1. Make sure being in "Edit Mode" and all devices are inserted and connected.
- 2. Right click on the Map icon ₩ in Device and Map Tree List to obtain the option menu to delete map, or just click the **Delete** button.
- 3. Repeat step 2 to delete more map.
- 4. Click the **Upload** button to activate all the settings.

## 6.1.5 Add/Rotate Device Indicator

- 1. Make sure being in "Edit Mode" and all devices are inserted and connected.
- 2. Select the map which you want to add device indicator on.
- 3. Select a device from list and directly drag it to the desired location on the map.
- 4. Select a camera indicator and right click on the indicator or click the **Rotate** button to adjust the direction of camera indicator if needed.
- 5. Repeat steps 2 and 4 to add more indicators on.
- 6. Click the **Upload** button to activate all the settings.

## 6.1.6 Delete Device Indicator

- 1. Make sure being in "Edit Mode" and all devices are inserted and connected.
- 2. Select the indicator and right click on the indicator or click the **Delete** button.
- 3. Repeat step 2 to delete more indicators.
- 4. Click the **Upload** button to activate all the settings.

- Adjust the Layout: Click the triangular indicator to hide the Device and Map Tree List / Preview and Information Window on right and left side of the window. Click the indicator again to back to the default.
- Maximize the Map: Click the icon on the upper right to get the full screen display of E-map.

# 6.2 Remote Live Viewer Application

- 1. Startup > NUUO NVRsolo > Remote Live Viewer.
- 2. Click the **Start Monitor** button and select Open E-Map.

## 6.2.1 E-Map Control Panel

• **Server List**: Select a server to display the E-map of the server.

The E-Map function of Remote Live Viewer is quite similar with the one in Internet Explorer, so you can refer to the section of **Internet Explorer** for the details.

# 7.Playback

There are two ways to execute the playback function: with Internet Explorer or with the **Playback System** application.

# 7.1 Internet Explorer

## 7.1.1 Playback Control Panel

- Information Display Window: Displays video date and time, cue-in / cue-out point times, and speed.
- Audio Volume Control: Adjust the sound level.
- Screen Division: Allocate the sub-screen display by clicking on the desired layout icon. To switch to single camera display, double click a particular sub-screen. Double click the screen again to regain previous screen division layout.
- **Browse Mode**: Play the recorded video when in Search Mode.

- **Open Record**: Click the **Open Record** button to access the Date-Time Panel and select the video records which you want to review.
- General Setting
  - Record Display
    - Calendar View: view the Record Display Window as a calendar.
    - List Control: view the Record Display Window as a list control.
  - Play
    - Play when open: check this option to set the system to start playing the video clip every time a record is withdrawn.
    - Auto-skip when recording in motion-only mode: check this option to set up the system to automatically skip to the points where there were motions recorded.
    - Next interval: set the interval with which the video goes forward when you click the **Next** button on the control panel.
    - Previous interval: set the interval with which the video goes backward when you click the **Previous** button on the control panel.
  - Capture Image
    - Save in clipboard: the image will be saved in the clipboard and can be pasted to other application software.
    - Manually save the image file: you can manually select where you want to save the image, name the saved file, and choose the format you want to save the image.
    - Automatically save the image file: by presetting a path/URL and the image format, the system will automatically save the image accordingly when you click the **Save Image** button on the control panel.

You can right click on the camera screen to enable the following function.

#### Toggle Fullscreen

Enable ImmerVision PTZ ImmerVision Lens Setting Toggle Fullscreen Enable Vivotek FishEye PTZ Vivotek FishEye Lens Setting

- **Toggle Fullscreen**: Select it to view cameras with full screen. Press "Esc" or right click un-select full screen to go back to the original view.
- Enable ImmerVision PTZ: Adjust PTZ in PTZ mode.
- **ImmerVision Lens Setting**: Select the mode of lens, original, PTZ mode, Quad mode and Perimeter mode.
- Enable Vivotek Fish Eye PTZ: Adjust PTZ in PTZ mode.
- Vivotek Fish Eye Setting: Select the mode of lens, Original, Rectilinear

mode, Full-view panorama mode, Dual-view panorama mode. Type of modes depends on lens location.

- 🜌: refresh the Record Display Window.
- 🝳 or 💽: go to previous or next recording date.
- **Record Display Window**: Display the available recorded video records.
- **Date Time Period**: Select the start and end time points that indicate the time period you would like to view after choosing cameras.
- Video Preview: Check the Enable Preview option to view the selected video.
- Time Table (preset recording schedule): Click the 
  icon to select all channels; click the 
  icon to deselect all channels. Finally, use the

• **Recording Types**: Red line in bold represents always record. Blue line in bold represents record on event. Red thin line represents recording data. Black thin line represents that there are multiple video clips within the same period due to system time change (e.g. daylight saving time)

• Show Recording Schedule: Show the period of recording schedule in the time table.

• Show Event Log: Show the time of event detection in the time table. Color of event type can be defined by preference.

14	114	H	-
10			
	10		
			-
_			_

 From the Record Display Window at the top left of the Date Time Panel, select the date you want to search the record from. The red lines shown on the time table indicate available recorded video records.

- 2. Use color bars to differentiate recording types from each other. This will help you select video clips.
- 3. Highlight the video clip you want to review by left-clicking and dragging the time period. You may also utilize the Start Time and End Time in Date Time Period Section after choosing camera. In addition, modify the scale of the time table with the 🔎 or 🔎 icon on the bottom left.
- 4. If there are multiple videos of the time period you select, the following dialog may popup to guide you to select one to play.

nere are multiple vid nange. Please selec		same period due to	system time
Camera Name: L			
• 1st: from 201	2/03/26 12:45:18	to 2012/03/26 12:	50:18
C 2nd: from 201	2/03/26 12:44:0	7 to 2012/03/26 12:	49:07
			-

- 5. Check the **Enable Preview** option to get the preview of the video you select.
- 6. Click the camera name to increase or decrease cameras you want to playback.
- 7. Click the **OK** button.

The Record Display Window can be shown in (a) calendar view or (b) list control view. To modify the settings of the record display window, click the **General Setting** button at the right of the page.

## 7.1.3 Play the Recorded Video

- 1. Be sure that you have set the schedule / recording event first.
- 2. Open Internet Explorer and log in to the unit.
- 3. Click the **Playback** button on the top of the page.
- 4. Click the **Open Record** button.
- 5. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
- 6. Highlight the video records that you want to review.
- 7. Click the **OK** button.

## 7.1.4 Intelligent Search

After opening the recorded video, click the **Search Mode** button to obtain the Intelligent Search Tool panel. You can search for unusual events during the recording period.

There are 5 types of unusual events: *General Motion*, *Foreign Object*, *Missing Object*, *Focus Lost*, and *Camera Occlusion*.

- **General Motion**: Detect all movements in the defined area.
- Define detection zone by dragging to draw a detection zone. You may define more than one zone by repeating this step.
- Modify the sensitivity setting by changing the slider control. Moving toward the right will increase the sensitivity level, which means a relatively small movement will trigger the alarm.
- 3. Set the interval. Moving toward right will increase time interval so that the alarm will only be triggered when the movement lasts longer.

Smart Search	×
Alarm Event Type	
General Motion	<b>-</b>
Sensitivity:	
Interval:	· · · · ·
Region Definition	
Of Define detection zo	ine
O Define object size	
All	Clear
Draw Region	
Stop when found	Stop

- 4. Check the **Stop when found** option. If unchecked, the search tool will list all the events it found, instead of stopping at the moment the event found.
- 5. Click the **Search** button.
  - Foreign Object: Alarm is set on when any additional object appears in the defined area on the screen.

- 1. Define detection zone by dragging to draw a detection zone.
- 2. Modify the sensitivity setting.
- 3. Set the Interval.
- 4. Check the **Stop when found** option. If unchecked, the search tool will list all the events it found, instead of stopping at the moment the event found.
- 5. Click the **Search** button.
- **Missing Object**: Alarm is set on when the selected object is removed from the defined area on the screen.
- 1. Define detection object by dragging to draw a detection zone.
- 2. Modify the sensitivity setting.
- 3. Set the Interval.
- 4. Check the **Stop when found** option. If unchecked, the search tool will list all the events it found, instead of stopping at the moment the event found.
- 5. Click the **Search** button.
- **Focus Lost**: System will inform you when the camera(s) lose its focus.
- **Camera Occlusion**: Alarms when the camera is blocked.

#### 7.1.5 Recorded Video Enhancement

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Playback** button on the top of the page.
- 3. Click the **Open Record** button.
- 4. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
- 5. Highlight the video clip you want to review, and then click the **OK** button.
- 6. Click the **Enhancement** button.
- 7. Check the General Setting.
- Apply active channel: The settings will only be applied to the selected channel.
- Apply all channels: The settings will be applied to those currently shown on the screen.
- 8. Set the Filter Setting.
  - Visibility: Check the option and adjust the gamma value of the image to enhance the image and make

Post Processing Tool

,
OK Default

it cleaner.

- **Sharpen**: Check the option to activate the function. Move the slider control to the right to sharpen the image, to the left to soften it.
- **Brightness**: Check the option to activate the function. Move the slider control to the right to make the image brighter.
- **Contrast**: Check the option to activate the function. Move the slider control to the right to increase contrast.
- **Grey Scale**: Check the option to show the record in gray-scale mode so the image displays in black and white.
- 9. Click the **OK** button.
  - **Stop**: Stop the enhancement function and close the enhancement tool. (The system will automatically back to the default settings.)
  - **Default**: Back to the default settings, however, the enhancement tool still works.
  - **OK**: Apply the modifications of the settings.

## 7.1.6 Save a Video

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Playback** button on the top of the page.
- 3. Click the **Open Record** button.
- 4. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
- 5. Highlight the video clip you want to review, and then click the **OK** button.
- 6. Choose the camera display that you want to save as a video clip.
- 7. Set up the cue in and cue out points; the cue in and cue out time will be shown on the information window.

8. Click the **Save Video** button.

Export Video/Audio	<b></b>
Export File Path:	
Export Format:	
ASF	-
Use Profile:	
Windows Media Video 8	for Local Area Network (384 Kbps) 💌

End Time:	2012/09/20 09:30:08
Export Audio	
Export OSD	
🔲 Export Metadata Trans	saction
	OK Cancel

- 9. Choose the folder where you want to save the file.
- 10. Insert the file name and click the **Save** button.
- 11. Choose the export format.
- 12. Choose the use profile.
- 13. Check to export the recorded video with Audio, OSD and POS Transaction.
- 14. Click the  $\mathbf{OK}$  button.

We recommend that you export to the .asf format when saving video. In exporting to the .avi format, the frame rate will be increased when playing in the video player, causing the video to run faster than normal.

## 7.1.7 Save an Image

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Playback** button on the top of the page.
- 3. Click the **Open Record** button.
- 4. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
- 5. Highlight the video clip you want to review, and then click the **OK** button.
- 6. Choose the camera display that you want to save pictures.
- 7. Click the **Save Image** button when the image you want is shown on the screen.
- 8. Choose the folder where you want to save the file at.
- 9. Choose the folder and the image format (BMP or JPEG) you prefer.
- 10. Insert the file name.
- 11. Click the **Save** button.

You may skip step 3 by presetting the folder where you want to save the images and the format you want to save them in.

## 7.1.8 Print an Image

Print the current image of the video you choose.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Playback** button on the top of the page.
- 3. Click the **Open Record** button.
- 4. The Record Display Window will show the information of the available video clips. Select the date you want to search the record from.
- 5. Highlight the video clip you want to review, and then click the **OK** button.
- 6. Choose the camera display from which you want to print pictures.
- 7. Click the **Print** button when the image you want is shown on the screen.
- 8. Set print settings.

🍐 Print Setup	×

- **Print Content**: Print the image from currently selected channel or all the channels shown on the screen.
- Page Setting
  - > Print in original size: Check to have the image print in original size.
  - > Fit the page: Check to have the image fit the page.
  - Align Image: Top, center, or bottom
- 9. Click the **Print** button.

## 7.1.9 Backup the Recorded Video

Different from Save Video, the Backup function will save all the recorded videos which belong to the time slot you set, instead of the clips.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Open Record** button to select data.
- 3. Click the **Backup** button.

Start Time:	2012/09/20	• 09:30:00 •

# 7.2 Remote Playback System Application

## 7.2.1 Playback System Application Control Panel

The **Playback System** control panel is similar to the playback panel in Internet Explorer. Check **Playback Control Panel** for more details about those buttons.

## 7.2.2 Set up Unit Connections

Before using the **Playback System** application, you need to set a connection to your unit first.

- 1. Startup > NUUO NVRsolo > Playback System.
- 2. Click the **General Setting** button.
- 3. Click the **Server** tab.

Seneral Server OS	D Metadata	
Server Setting		🔚 Gangway 211 (192.168.4.223
Server Name:		
Address:		
Port:	5160	
User Name:		
Password:		
	Save Password	
	Test Server	
Add	Delete Update	I

- 4. Insert the name of your unit.
- 5. Insert the IP address of that unit.
- 6. Modify the port if necessary.
- 7. Insert the user name.
- 8. Insert the password.
- 9. Check the **Save Password** option.
- 10. Click the **Test Server** button to test the connection between the local application and the remote unit.
- 11. Click the **Add** button to add this unit into the remote server list.
- 12. Click the **OK** button.

#### 7.2.3 Search the Recorded Video

	😰 DateTime Search Dialog [Gangway 211]
Remote Playback Site Management	Image: Constraint of the second start Time:       2012/09/19 + 11:29:00 + 11:29:0
	• • 09/19       0       1       2       3       4       5       6       7       8       9       10       11       12       13       14       15       10       10         Location 1       • <td< th=""></td<>
	Record on Event

- 1. Startup > NUUO NVRsolo > Playback System.
- 2. Click the **Open Record** button.
- 3. Click the 🕥 icon on the top of the Date-Time Panel to obtain the Remote Playback Site Management dialog, and then select the server you want to access.
- 4. Highlight the records you want to view in the Time Table.
- 5. Set the Date Time Period.

The search process in the **Playback System** application is similar to that of Internet Explorer. Check **Search the Recorded Video** for more details about the setting process.

#### 7.2.4 Play the Recorded Video

- 1. Be sure that you have set up the recording schedule / response first.
- 2. Startup > NUUO NVRsolo > Playback System.
- Click the General Setting button and the Server tab to set connections to your unit. See <u>Set up Unit Connections</u> for more details.
- 4. Click the **Open Record** button.
- The Record Display Window will show the information of the available video clips. Select the date you want to search the record from. Check <u>Search</u> <u>the Recorded Video</u> for more details.
- 6. Highlight the video records that you want to review.
- 7. Select the start and end points in Date Time Period to adjust the time slot.
- 8. Click the **OK** button.

#### 7.2.5 Intelligent Search

- 1. Startup > NUUO NVRsolo > Playback System.
- 2. Click the **Open Record** button.
- The Record Display Window will show the information of the available video clips. Select the date you want to search the record from. Check <u>Search the Recorded Video</u> for more details.
- 4. Highlight the video records that you want to review.
- 5. Choose the camera display for which you want to implement smart search.
- 6. Click the **Search Mode** button to open the Intelligent Search Tool panel.
- 7. Set up unusual events here to detect abnormalities occurring during the

recoding period. Check **Intelligent Search** for more details.

8. The searched events will be listed. Click to find that event.

# There are 5 types of unusual events: *General Motion*, *Foreign Object*, *Missing Object*, *Focus Lost*, and *Camera Occlusion*.

- **General Motion**: Detect all movements in the defined area.
- Foreign Object: Alarm when any additional object appears in the defined area on the screen.
- **Missing Object**: Alarm when the selected object is removed from the defined area on the screen.
- Focus Lost: System will inform you when the camera(s) lose focus.
- **Camera Occlusion**: Alarm when the camera is blocked.

The intelligent search in the **Playback System** application is similar to that of Internet Explorer.

#### 7.2.6 Recorded Video Enhancement

- 1. Startup > NUUO NVRsolo > Playback System.
- 2. Click the **Open Record** button.
- The Record Display Window will show the information of the available video clips. Select the date you want to search the record from. Check <u>Search the Recorded Video</u> for more details.
- 4. Highlight the video records that you want to review.
- 5. Choose the camera display that you want to implement video enhancement.
- 6. Click the **Enhancement** button.
- 7. Check the General Setting.
- Apply active channel: The settings will only be applied to the selected channel.
- Apply all channels: The settings will be applied to those currently shown on the screen.
- 8. Set the Filter Setting.
  - Visibility: Check the option and adjust the gamma value of the image to enhance the image and make it cleaner.
  - **Sharpen**: Check the option to activate the function. Move the slider

control to the right to sharpen the image, to the left to soften it.

- **Brightness**: Check the option to activate the function. Move the slider control to the right to make the image brighter.
- **Contrast**: Check the option to activate the function. Move the slider control to the right to increase contrast.
- **Grey Scale**: Check the option to show the record in gray-scale mode so the image displays in black and white.
- 9. Click the **OK** button.
  - **Stop**: Stop the enhancement function and close the enhancement tool. (The system will automatically revert back to the default settings.)
  - **Default**: Back to the default settings, however, the enhancement tool still works.
  - **OK**: Apply the modifications of the settings.

#### 7.2.7 Save a Video

- 1. Startup > NUUO NVRsolo > Playback System.
- 2. Click the **Open Record** button.
- The Record Display Window will show the information of the available video clips. Select the date from which you want to search the record. Check <u>Search the Recorded Video</u> for more details.
- 4. Highlight the video records that you want to review.
- 5. Choose the camera display that you want to save as a video clip.
- 6. Set up the cue in and cue out points; the cue in and cue out time will show on the information window.

- 7. Click the **Save Video** button.
- 8. Choose the folder where you want to save the file.
- 9. Insert the file name and click the **Save** button.
- 10. Choose the export format.
- 11. Choose the use profile.
- 12. Check the **Export Audio** option.
- 13. Click the **OK** button.

#### 7.2.8 Save an Image

- 1. Startup > NUUO NVRsolo > Playback System.
- 2. Click the **Open Record** button.
- The Record Display Window will show the information of the available video clips. Select the date from which you want to search the record. Check <u>Search the Recorded Video</u> for more details.
- 4. Highlight the video records that you want to review.
- 5. Choose the camera display from which you want to save pictures.
- 6. Click the **Save Image** button when the image you want is shown on the screen.
- 7. Choose the folder where you want to save the file at.
- 8. Choose the format of image (BMP or JPEG) you prefer.
- 9. Insert the file name.
- 10. Click the **Save** button.

You may skip step 7 by presetting a folder where you want to save the images and a format which you want to save the images in.

#### 7.2.9 Print an Image

Print the current image of the video you choose.

- 1. Startup > NUUO NVRsolo > Playback System.
- 2. Click the **Open Record** button.
- The Record Display Window will show the information of the available video clips. Select the date you want to search the record from. Check Search the Recorded Video for more details.
- 4. Highlight the video records that you want to review.
- 5. Choose the camera display that you want to print pictures.
- 6. Click the **Print** button.
- 7. Set the print settings.
- **Print Content**: Print the image from currently selected channel or all the channels shown on the screen.
- Page Setting
  - > Print in original size: Select to have the image print in original size.
  - > Fit the page: Select to have the image fit the page.
  - Align Image: Top, center, or bottom

#### 7.2.10 Backup the Recorded Video

Different from Save Video, the Backup function will save all the recorded videos which belong to the time slot you set, instead of the clips.

- 1. Startup > NUUO NVRsolo > Playback System.
- 2. Click the **Open Record** button to select data.
- 3. Click the **Backup** button.
- 4. Set the Start Time and End Time you want to backup.
- 5. Select the cameras you want to backup.
- 6. Select the directory you want to save the backup data.
- 7. Click the **Backup** button.

# 8.Backup and Delete Records

### 8.1 The Backup System Application

In addition to the ways mentioned in the previous chapters, you can apply the application to backup your files.

1. Startup > NUUO NVRsolo > Backup System.

2. Click the **Remote Server Site** 🚳 button to set up remote server.

Server		
Server Name:		
Address:		
Port:	5160	
User Name:		
Password:		
	Save Password	
	Test Server	
Add	Delete Update	

- 3. Insert the name of your unit.
- 4. Insert the IP address of that unit.
- 5. Modify the port if necessary.

- 6. Insert the user name.
- 7. Insert the password.
- 8. Check the **Save Password** option.
- 9. Click the **Test Server** button to test the connection between the local application and the remote unit.
- 10. Click the **Add** button to add this unit into the remote server list.
- 11. Click the **OK** button.
- Click the ▼ button next to Remote Server Site button, and select one of servers you added.

21. Click the **OK** button.

#### 8.2 Backup the Recorded Video through FTP

- Find your unit through Windows Explorer (insert "ftp://" plus the IP address of your unit)
- 2. Insert the name and password of the administrator.
- 3. Select the volume and open the "VIDEODATA" folder.
- 4. Copy the date folder which you want to backup to your desktop / laptop.

# 8.3 Playback the Backup Records

#### 8.3.1 With Playback Application

- 1. Use the Backup System application to backup your records.
- 2. Check the **Include Playback application** option, which will add the **Playback** application into the backup folder.
- 3. Open that folder.
- 4. Double-click the Playback application icon.
- 5. Select the recorded data to play back.

#### 8.3.2 Without Playback Application

- 1. Use the Playback function to backup your records.
- Put your backup folder into the program folder of NVRsolo. (Default directory is "C:\Program Files\NUUO\NVRsolo".)
- 3. Startup > NUUO NVRsolo > Playback System.
- 4. Click the **Open Record** button.
- 5. Select the recorded data to play back.

# 8.4 Delete the Recorded Video

#### 8.4.1 With Backup Application

1. Startup > NUUO NVRsolo > Backup System.

# 9.Verification Tool

The Verification Tool verifies whether the data created by the system has been tampered with. It's the process by which a digital watermark (a digital signature) is added to each recorded video frame to ensure its authenticity.

There are three types of data could be verified by Verification Tool:

- 1. File in (.dat) (.264) format will be displayed as  $\checkmark$ .
- 2. File in (.avi) (.asf) format will be displayed as 🛤.
- 3. File in (.bmp) (.jpg) format will be displayed as 🛸.

# 9.1 Execute Verification Tool

- 1. Startup > NUUO NVRsolo > Verification Tool.
- 2. Verification Tool Overview

- Add File: Insert the single file to list for verification.
- Add Folder: Choose the folder with multiple files to list for verification.
- **Remove File**: Remove indicated file(s) from list.
- **Select All**: Select all files in list for verification.

Choose the file type first before selecting files. Only (.dat) (.264) (.avi) (.asf) (.bmp) (.jpg) are available to open.

Video Preview: Preview designate file in verification list. Select the buttons below to play ▶, pause II, and stop the video file.

# 9.2 Verify Image / Video

- 1. Select single or multiple files for verification.
- 2. Click the **Verify button** to start verification.
- 3. The verification result will show on watermark column. If a file was tampered with, it will show **★**; if a file passed verification, it will show **↓**.

**Verification report** 

4. The verification report will indicate the information related to the verification.

# 10. External Storage

Total recording space can be expanded largely by connecting DAS through eSATA port. Follow the directions to enlarge your recording space.

#### **10.1Create a Volume on DAS**

The current compatible DAS is AXUS FiT Series. We don't guarantee the quality of other DAS models. Please refer to the manual of AXUS FiT Series to create a single volume on DAS.

We are unable to create a volume on external storage in NVR setting page, so do NOT skip this step before connecting to NVR device.

#### **10.2Create an External Storage**

- 1. Log in to the unit.
- 2. Click RAID & File System / RAID Management.
- 3. You will find External SATA Disk displayed in Disk List.

RAID Status Modify Creat	e Delete Format		
😸 RAID Status			
List	Status		
- Volumes	RAID Name	VOLUME1	
- VOLUME1	RAID Level	RAID0	
Disk 2	RAID Status	Functional	
- Free Disks	Total Capacity	298.08 GB (305244 MB)	
and the second	Free Capacity	290.24 GB (297208 MB)	
— Disk 6 (eSATA)	Used Capacity	3.16 GB (3244 MB)	
	Usage		2%
	Update Time	Friday, November 18, 2011 4:15:29 PM	
	Total Devices	1	
	Active Devices	1	
	Failed Devices	0	
	Spare Devices	0	
	Format Progress		
	Recovery Progress		

4. Click on the eSATA disk directly to check the disk drive information.

RAID Status Modify	Create	Delete	Format	1		
😸 RAID Status						
List		Statu	s			
Volumes VOLUME1 Disk 2			Vendor		Seagate	
			Model		ST32000542AS	
			Capacity		1929GB	
		Firmware Version		Firmware Version	0957	
		Serial No.		Serial No.	6RY6GK1T	
Disk 6 (eSATA)		Smart Support		Smart Support	Yes	
		Smart Enable		Smart Enable	Enable	

Refer to the section of **<u>Create a RAID Volume</u>** to create a volume for it.

# 11. Log out

Click the **Logout** button on the top of the page to log out of the system. If there is no action in 10 minutes, the system will log out automatically to avoid unauthorized access.

# **12. Remote PC System Requirements**

Remote PC Minimum Requirements				
Model	1/8 bay			
OS	Windows XP 32 bit, Windows 7 32/64 bit,			
Supported	pported Windows 8 32/64 bit			
CPU	Intel Core 2 Duo, 2.6GHz			
RAM	1GB			
User	<b>User</b> 1. HTTP Web browser - Internet Explorer 8, 9,			
Interface	iterface 10 (32 bit)			
	2. NUUO client application program			

#### 12.1UPnP Support

In remote PC system, user can find all the camera devices in the Windows "Network". This function allows user can mass upgrade SNVRs/ IPCs at one time by using IPInstaller.

# 13. Troubleshooting

#### 13.1Replace a Failed Disk Drive

If a disk drive fails, the Disk Status LED becomes orange. If the disk drive belongs to a RAID Volume, the Volume goes Critical or Offline, depending on RAID level. See **Check RAID Volume Status** for details.

Replace the failed disk drive with a new disk drive of the same or slightly greater capacity. You do not have to power down the unit. Refer to **Modify RAID Volume** to remove the failed disk and replace it with a new one.

#### **13.2Respond to a Critical RAID Volume**

How the unit responding to a Critical RAID Volume depends on the RAID level of your Volume:

- For **RAID 1, 5, and 10** volumes, you must replace the failed disk drive with a new one. The RAID Volume will begin rebuilding itself when you install the new disk drive. See **<u>Replace a Failed Disk Drive</u>** for details.
- **RAID 0** volumes go offline after a disk drive failure. A **RAID 0** Volume cannot be recovery. All data of the volume is lost.

# 13.3 Respond to a File System Error RAID Volume

When encountering file system error, you are unable to keep the data anymore. It's likely due to abnormal usage and disk damage. In this case, if you want to keep recording, we suggest replacing new disks, or try the following methods.

- 1. Format this volume, and check if the status becomes *functional*. If yes, you can start recording. If it doesn't, try the second method.
- Delete this volume, and create volume again to see if the status is functional.

# **13.4Restore the Default Administrator's Password**

If you forget the password, and want to reset the Administrator's password to the default password: **admin**, follow the following steps.

- 1. Verify that the system is fully booted.
- 2. Insert your reset tool into the reset button hole on the back of the device.
- 3. Press and hold the reset button for 8 seconds, release your hands until the buzzer beeps one time and the System Status LED flashes in blue.
- 4. System will restart and the Administrator's password is now reset to **admin**.

# **13.5**Restore All Default Configuration

If you want to restore all configurations to default setting, follow the following steps.

- 1. Verify that the system is fully booted.
- 2. Insert your reset tool into the reset button hole on the back of the device.
- 3. Press and hold the reset button for 14 seconds, release your hands until the buzzer beeps twice and the System Status LED flashes in orange.
- 4. System will restart and all settings are reset to default.

RAID volume and data within the volume won't be reset to default. Refer to **Format** for the details.

# 13.6Install ActiveX

If you cannot see the complete page of the system when using Internet

Explorer, it may be because the ActiveX installation process is not completed.

- 1. Open Internet Explorer and log in to the unit.
- 2. Click the **Live view / Playback** button on the top right.
- 3. The browser will ask whether to install ActiveX.

Favorites	-on: 'NVSWebAll.cab' from 'NUUO Inc.'. If you trust the website and the add-on and v	avant to install it, click here
	I UUO Serreilanos Soldon	Free Capacity: 907.3 G8 Free Capacity: 907.3 G8 Settings   Live View   Playback   Help   Logout
	Click here to install the following ActiveX control: TWSWebAll cab' from NUUD inc:	

- 4. Click the upper bar to begin the installation process.
- 5. Click the **Install** button to complete the process.

# 13.7Cannot Log in to the Unit with Internet Explorer

- 1. Check the settings of your antivirus software.
- 2. Change to appropriate settings or turn off this antivirus software.

Please visit NUUO wiki for more information. http://support.nuuo.com/mediawiki/index.php/Main\_Page

# Appendix – RAID System

# Introduction to RAID

RAID (Redundant Array of Independent Disks) allows multiple disk drives to be combined together into a RAID Volume. You will create a RAID Volume on your unit when you perform the setup procedure.

The benefits of a RAID can include:

- Higher data transfer rates for increased server performance
- Increased overall storage capacity for a single Volume
- Data redundancy/fault tolerance for ensuring continuous system operation in the event of a disk drive failure

Different RAID levels use different organizational models and have varying benefits. The following outline breaks down the properties for each RAID level supported on this unit:

# RAID 0 – Stripe

When a RAID Volume is striped, the read and write blocks of data are interleaved between the sectors of multiple disk drives. Performance is increased, since the workload is balanced between drives or "members" that form the RAID Volume. Identical drives are recommended for performance as well as data storage efficiency.

The RAID Volume's data capacity equals the capacity of the smallest disk drive times the number of disk drives. For example, one 100 GB and three 120 GB drives will form a 400 GB (4 x 100 GB) RAID Volume instead of 460 GB.

If disk drives of different capacities are used, there will also be unused capacity on the larger drives.

Because RAID 0 does not offer Fault Tolerance, meaning that you cannot recover your data after a disk drive failure, we do not recommend a RAID 0 Volume for your unit.

RAID 0 Volumes on this unit consist of one or more disk drives.

# RAID 1 – Mirror

When a RAID Volume is mirrored, identical data is written to a pair of disk drives, while reads are performed in parallel. The reads are performed using elevator seek and load balancing techniques where the workload is distributed in the most efficient manner. Whichever drive is not busy and is positioned closer to the data will be accessed first.

With RAID 1, if one disk drive fails or has errors, the other mirrored disk drive continues to function. This is called Fault Tolerance. Moreover, if a spare disk drive is present, the spare drive will be used as the replacement drive and data will begin to be mirrored to it from the remaining good drive.

The RAID Volume's data capacity equals the smaller disk drive. For example, a 100 GB disk drive and a 120 GB disk drive have a combined capacity of 100 GB in a mirrored RAID Volume.

If disk drives of different capacities are used, there will also be unused capacity on the larger drive.

RAID 1 Volumes on this unit consist of two disk drives.

If you want a mirrored RAID Volume with more than two disk drives, see **RAID 10 – Mirror / Stripe** for details.

# **RAID 5 – Block Striping with Distributed Parity**

RAID 5 organizes block data and parity data across the disk drives. Generally, RAID level 5 tends to exhibit lower random write performance due to the heavy workload of parity recalculation for each I/O. RAID 5 works well for file, database, application and web servers.

The capacity of a RAID 5 Volume equals the smallest disk drive times the number of disk drives, minus one. Hence, a RAID 5 Volume with four 100 GB disk drives will have a capacity of 300 GB. A RAID Volume with two 120 GB disk drives and one 100 GB disk drive will have a capacity of 200 GB.

RAID 5 is generally considered to be the most versatile RAID level.

RAID 5 requires a minimum of three disk drives.

# RAID 10 – Mirror / Stripe

Mirror/Stripe combines both of the RAID 0 and RAID 1 types. RAID 10 can increase performance by reading and writing data in parallel while protecting data with duplication. At least four disk drives are needed for RAID 10 to be installed. With a four-disk-drive RAID Volume, one drive pair is mirrored together then striped over a second drive pair.

The data capacity RAID 10 Volume equals the capacity of the smallest disk drive times the number of disk drives, divided by two.

In some cases, RAID 10 offers double fault tolerance, depending on which disk drives fail.

RAID 10 Volumes on this unit consist of four disk drives.

Because all of the available disk drives are used for the RAID Volume, you cannot set up a spare drive with RAID 10.

#### Choosing a RAID Level

There are several issues to consider when choosing the RAID level. The following summarizes some advantages, disadvantages and applications for each choice.

#### • RAID 0

Advantage	Disadvantage
<ul> <li>Implements a striped disk RAID Volume, the data is broken down into blocks and each block is written to a separate disk drive</li> <li>I/O performance is greatly</li> </ul>	<ul> <li>Not a true RAID because it is not fault tolerant</li> <li>The failure of just one drive will result in all data in a RAID Volume</li> </ul>

improved by spreading the I/O	being lost
load across many channels and	• Should not be used in mission
drives	critical environments
• No parity calculation overhead is	
involved	

#### • RAID 1

	Advantage		Disadvantage
•	Simplest RAID storage subsystem design	•	Very high disk overhead - uses only 50% of total capacity
•	Can increase read performance by		
	processing data requests in		
	parallel since the same data		
	resides on two different drives		

#### • RAID 5

	Advantage	Disadvantage
•	High Read data transaction rate	• Disk failure has a medium impact
•	Medium Write data transaction	on throughput
	rate	
•	Good aggregate transfer rate	
•	Most versatile RAID level	

#### • **RAID 10**

Advantage	Disadvantage
<ul> <li>Implemented as a mirrored RAID</li> <li>Volume whose segments are RAID</li> </ul>	<ul> <li>Very high disk overhead – uses only 50% of total capacity</li> </ul>
0 RAID Volumes	
• High I/O rates are achieved	
thanks to multiple stripe	
segments	

# **Appendix – Camera Integration**

# **Camera Support List**

Any information about camera integration, including camera model and its spec, please refer to NUUO website at www.nuuo.com
